

ChronosHub

February 2026 Virtual All-Hands Meeting

February 26, 2026

Agenda

- 1 Staff Updates
- 2 Product Update
- 3 Commercial Update
- 4 Presentation Template Update
- 5 Event Committee Update
- 6 People & Culture Update

Staff Updates

WELCOME!

Christel Dyrstad joins us Head of Finance,
Operations team

WELCOME!

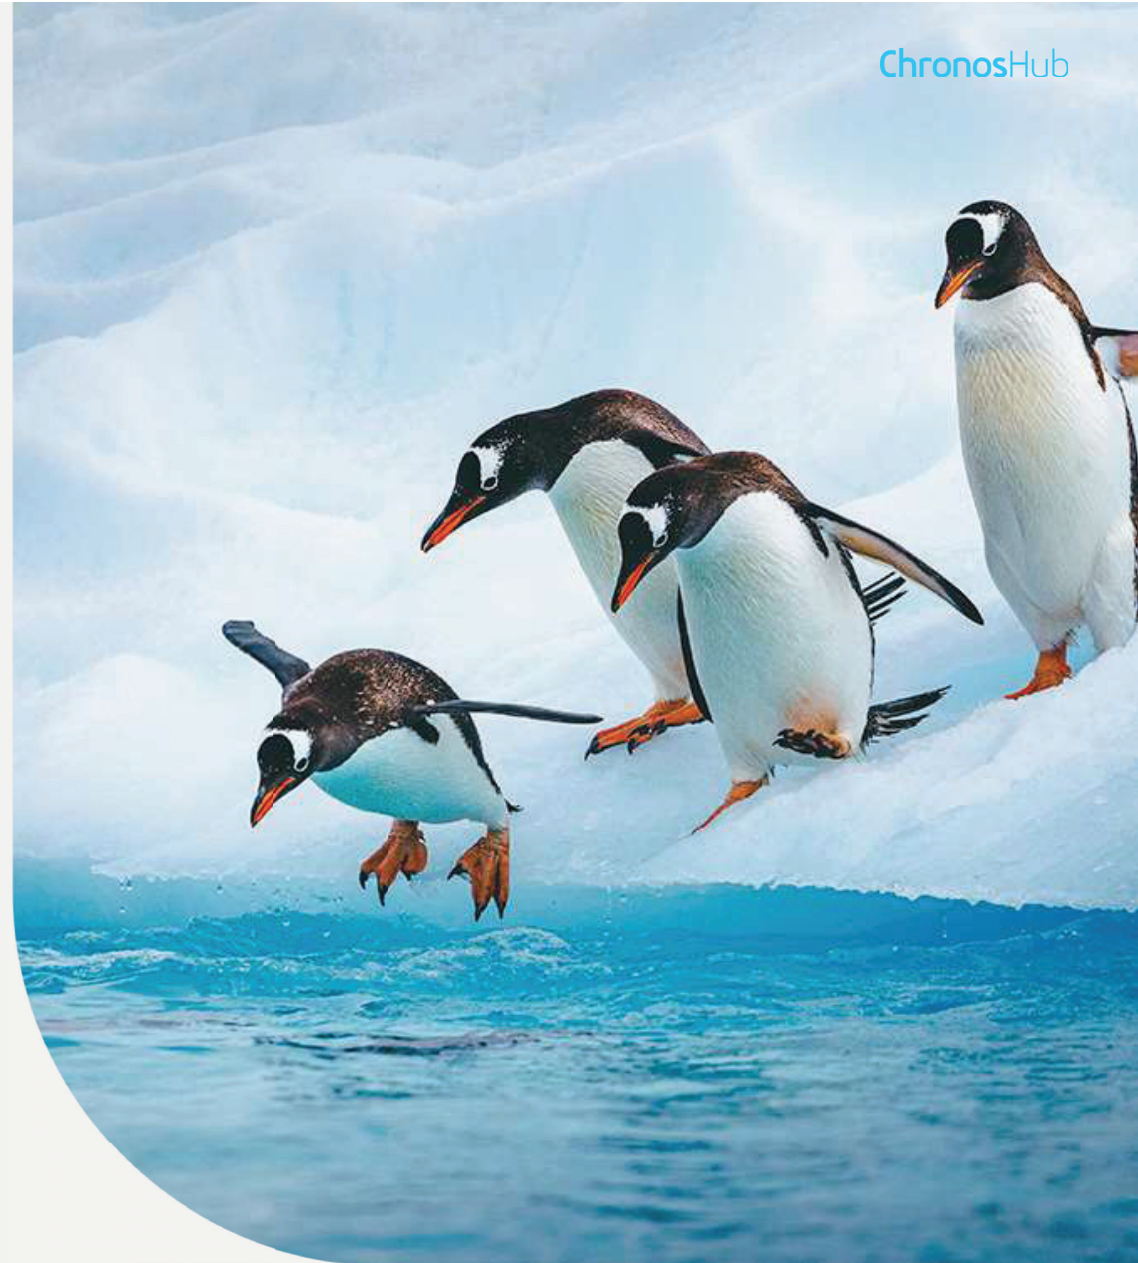

Martin Rosen-Lidholm joins as VP of
Product & Engineering

New Starters

March 2nd

- Kent Damm Appelby, Partner Manager

Open positions

- **Engineering**
Sr. Backend Engineer – Platform Team
- **Commercial:**
Customer Success, Publisher
- **Customer Care:**
Tech Support

Product & Engineering Update

- Agentic Engineering and hiring onwards
- Agentic Product Engineering User Group

Product Team

Migration to Linear

Linear gives ChronosHub a single system of record across product, design, engineering, and delivery — connecting strategic goals to daily execution. If it isn't in Linear, it doesn't exist.

Purpose-built for product and engineering teams

Initiatives, projects, milestones, and issues give every team a shared language for how work gets planned and delivered.

Developer-friendly by design

Clean APIs gave us full control to build a custom Freshdesk integration on our terms, without waiting on a native solution.

AI-native via Model Context Protocol (MCP)

Via MCP, Claude and ChatGPT interface directly with Linear using ChronosHub standards to draft and shape initiatives, projects, and issues.

Enforces discipline around complete, well-defined work

Structured templates and required fields ensure every project and issue is properly scoped before a team picks it up.

Milestones

Pilot with Platform
Feb 2, 2026

Sign-off (EMs, Commercial, Ops)
Feb 27, 2026

Teams migrated off DevOps/Slack
Mar 31, 2026

Product Playbook

How ChronosHub Uses Linear

Conventions, templates, and AI prompts for PMs and delivery managers.

Get Started

Linear Quick Guide

Guides

When and how to use Linear — decision trees, conventions, and the reasoning behind our standards.

Templates

Output structures for issues, projects, and initiatives that match ChronosHub standards.

AI Prompts

Task-specific instructions that tell AI tools how to draft Linear content for you.

Migration to Linear

I have a project in linear called Ledger. I need to fill it out with some more information so its ready for discovery

Let me pull up the Ledger project from Linear.

[List projects >](#)

Here's where Ledger stands right now:

Field	Current State
Status	Options Pool
Summary	Empty
Description	Template placeholders only — not filled in
Lead	Not assigned
Start Date	Not set
Target Date	Not set
Team	Platform
Initiative	None linked

To get this ready for discovery, per your conventions it needs to move to **Ready** with all required fields filled in. That means we need a summary, description, lead, start date, and target date.

Let's start with the most important piece — what problem is Ledger solving? Give me the rough brief and I'll draft the project description.

Opus 4.6

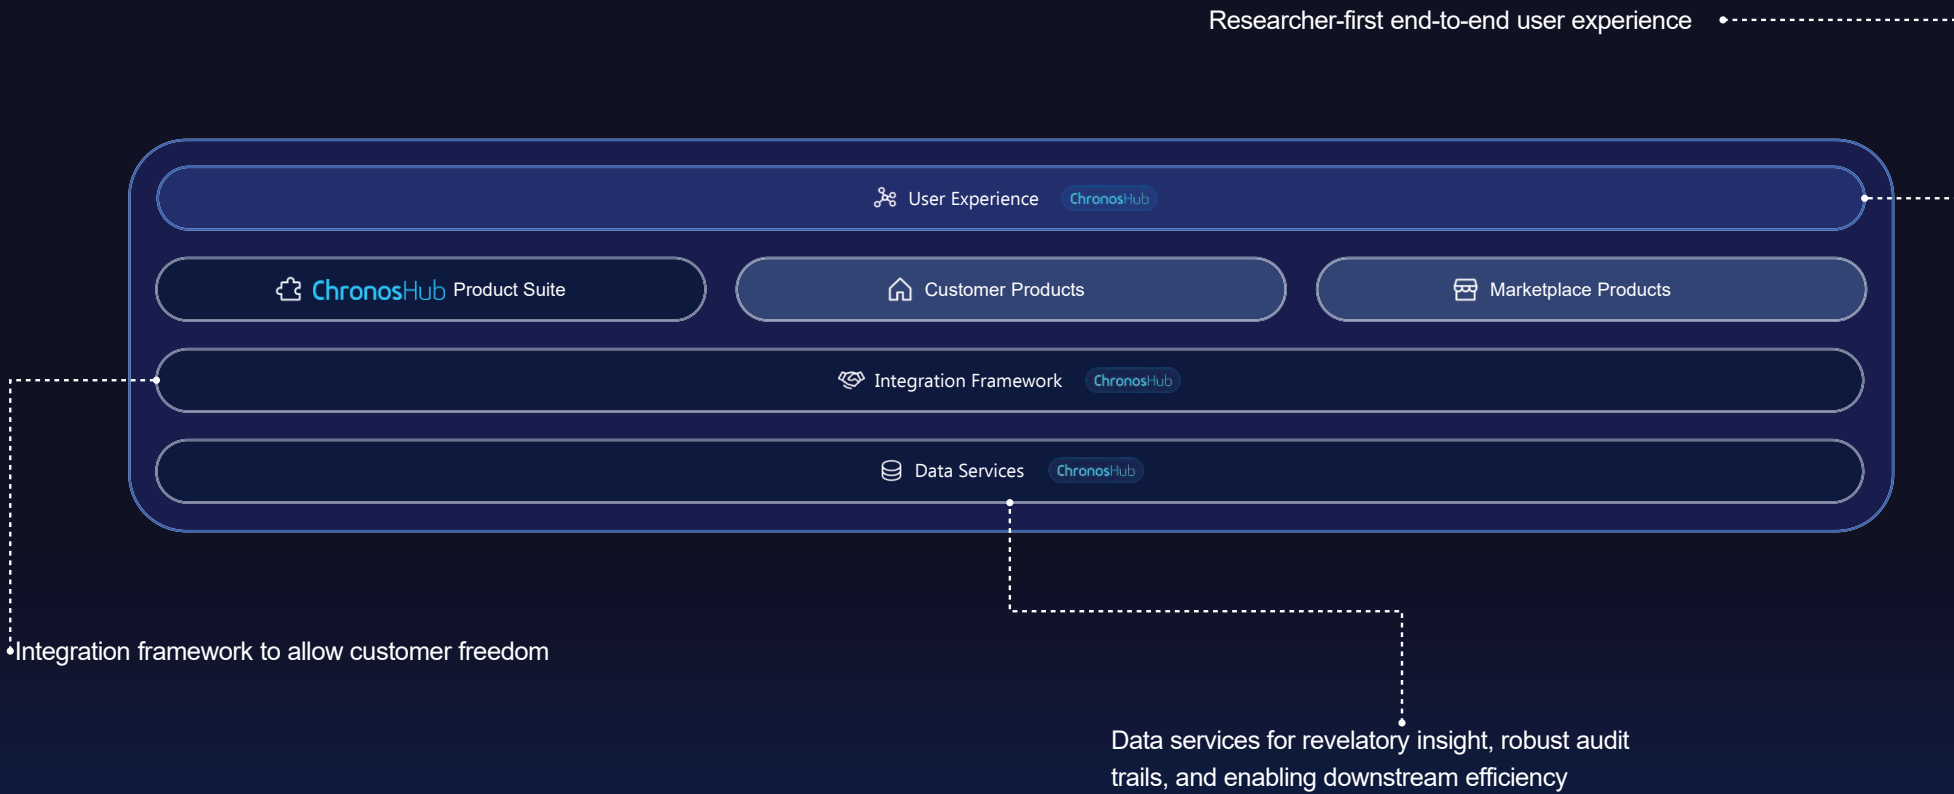

Our product vision

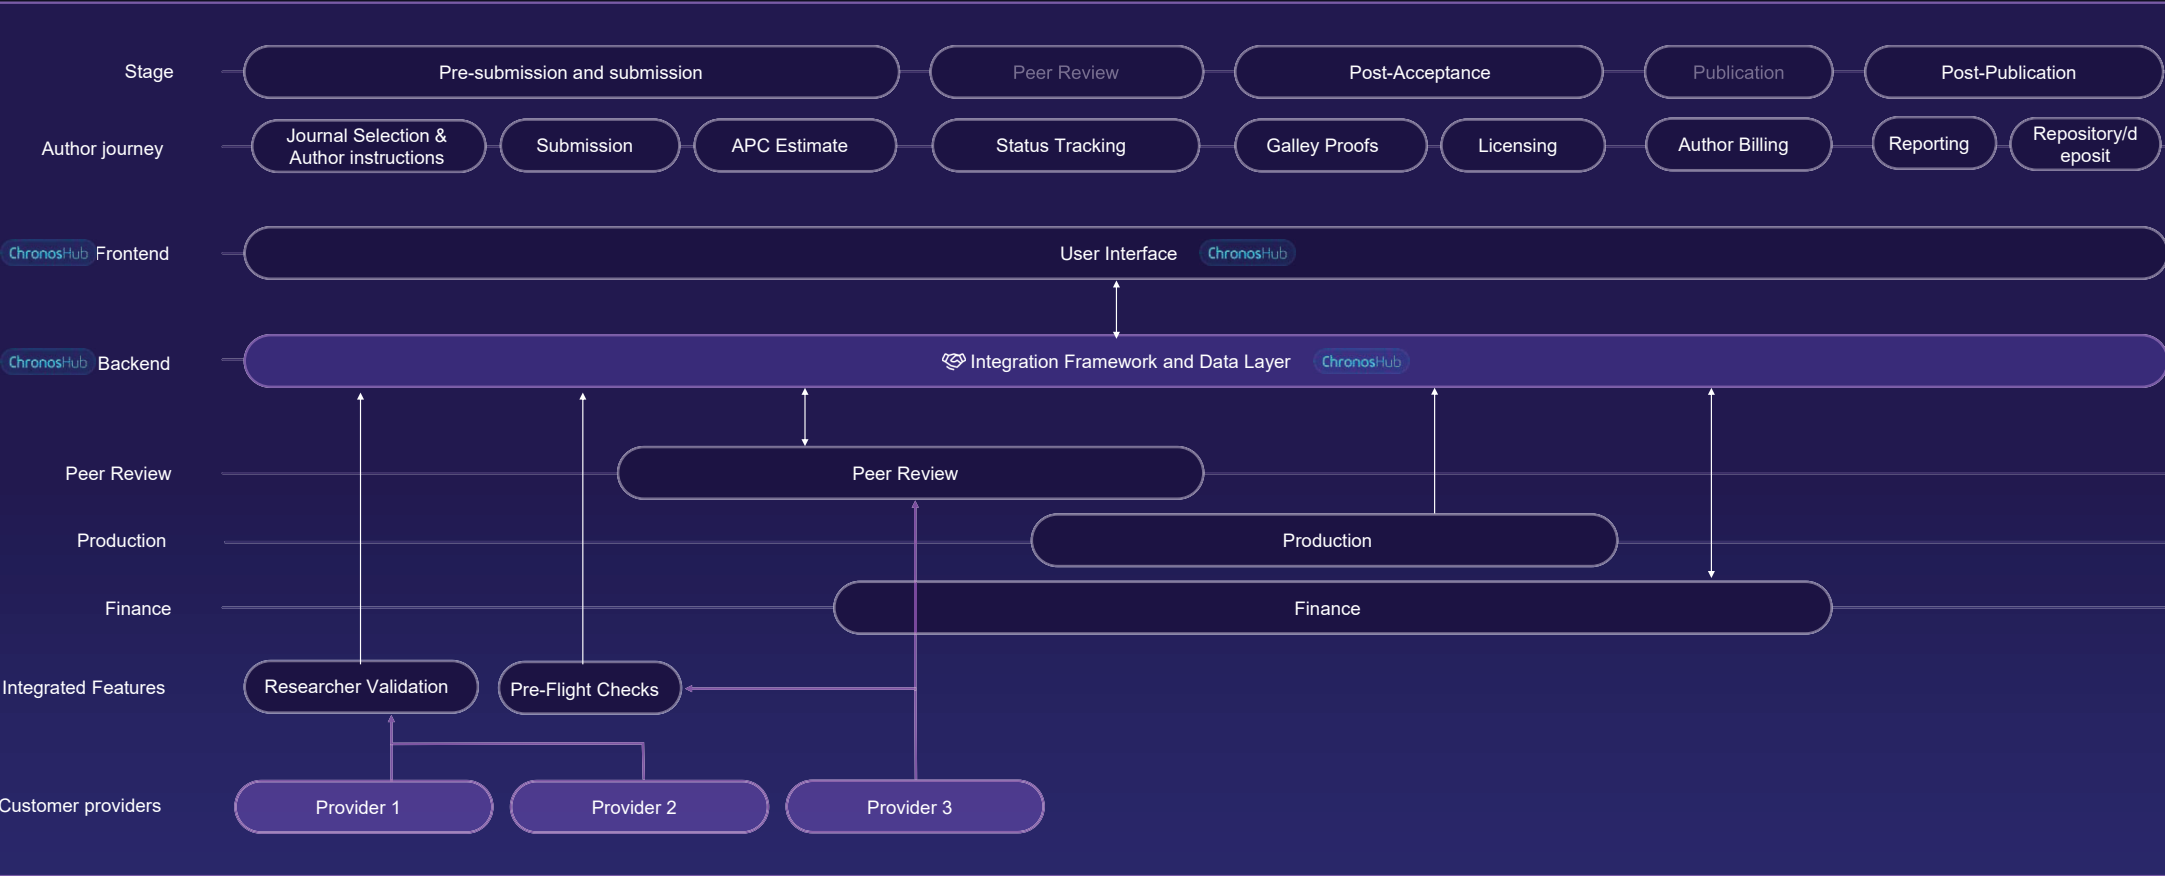

Our products transform publishing workflows through seamless integrations and industry-leading user experience, empowering publishers to evolve their technology and business models on their own terms.

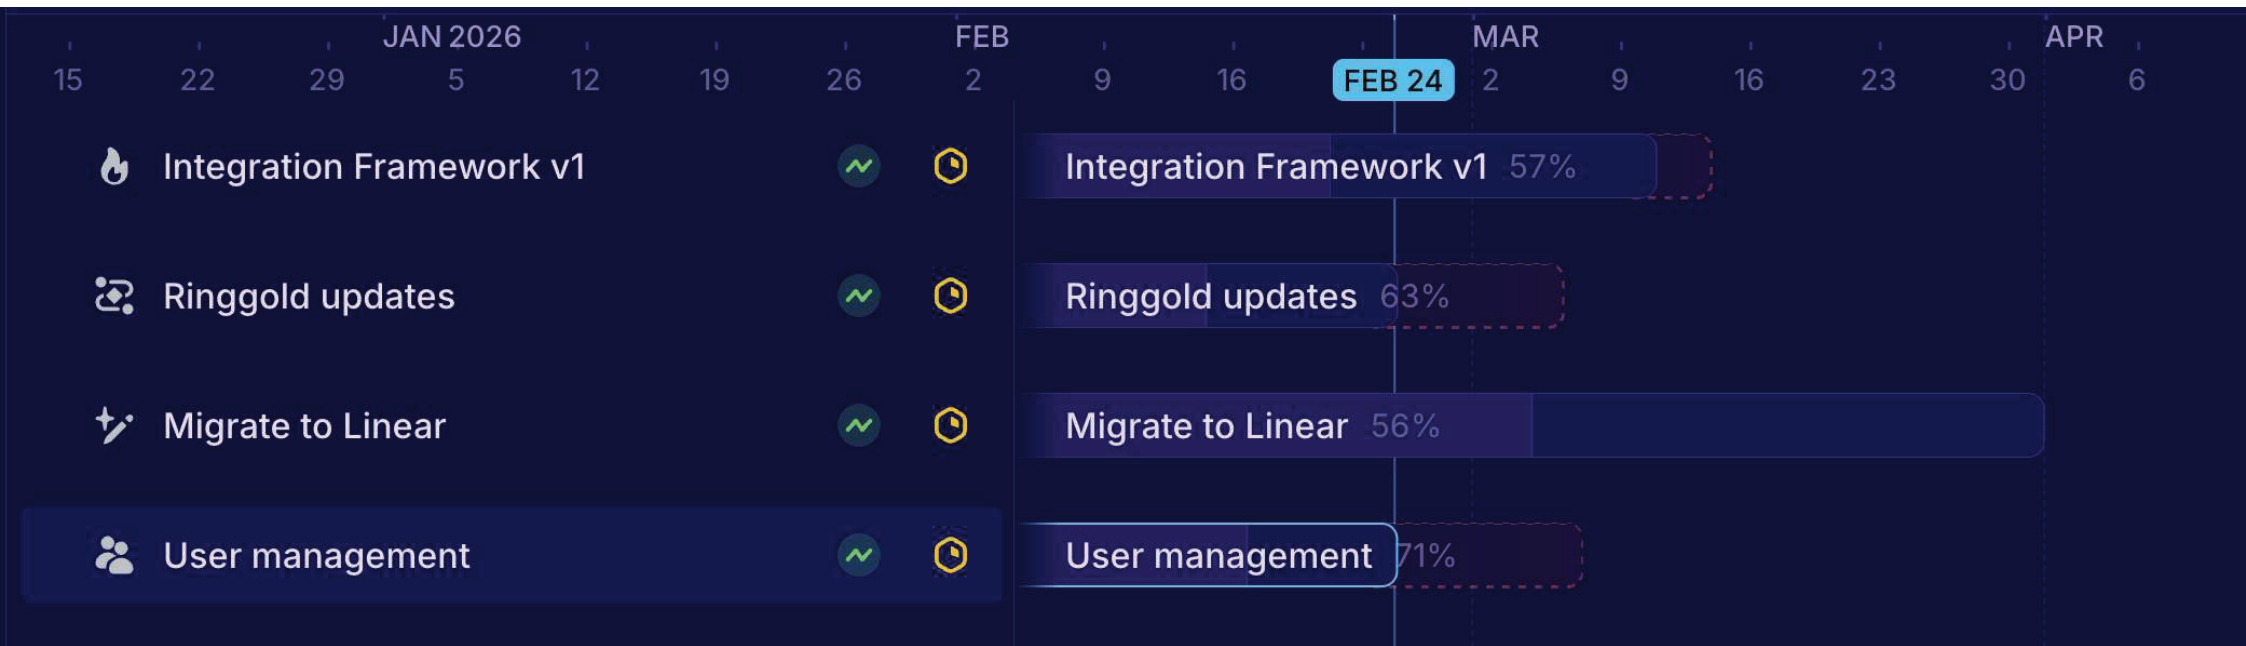

Product vision

Platform vision

Platform Team

D&D last month's highlights

Customer Focus

- Thieme final post-launch dev items delivered (Billing Report, invoice delivery)
- Karger agreement check report (for 2nd/3rd corr authors)
- JTF report

Stabilization

- Bugs: continued downward trend of bugs created:
 - Down by 48% since Oct '25 for customer reported bugs
 - Getting better at solving within target time
- Daily Data Checks to avoid creation of bugs
- Journal data clean-up for institutions
- Surface institutional identifiers (test)

New development

- All Articles 2.0 in test! ☐
- Agreement Manager client to app
- Journal Manager 1.5 user stories
- Post-Acceptance 2.0 planning

D&D looking ahead

Analytics

- Product analytics tool
- Metrics measurements of 'as is' for all new dev so we have a benchmark and can measure success
- Examples: All Articles, Post-Acceptance event triggers

Discovery

- Post-Acceptance architecture
- Agreement Report & Approval Dashboard
- Journal Manager – journal license & pricing rules

New development

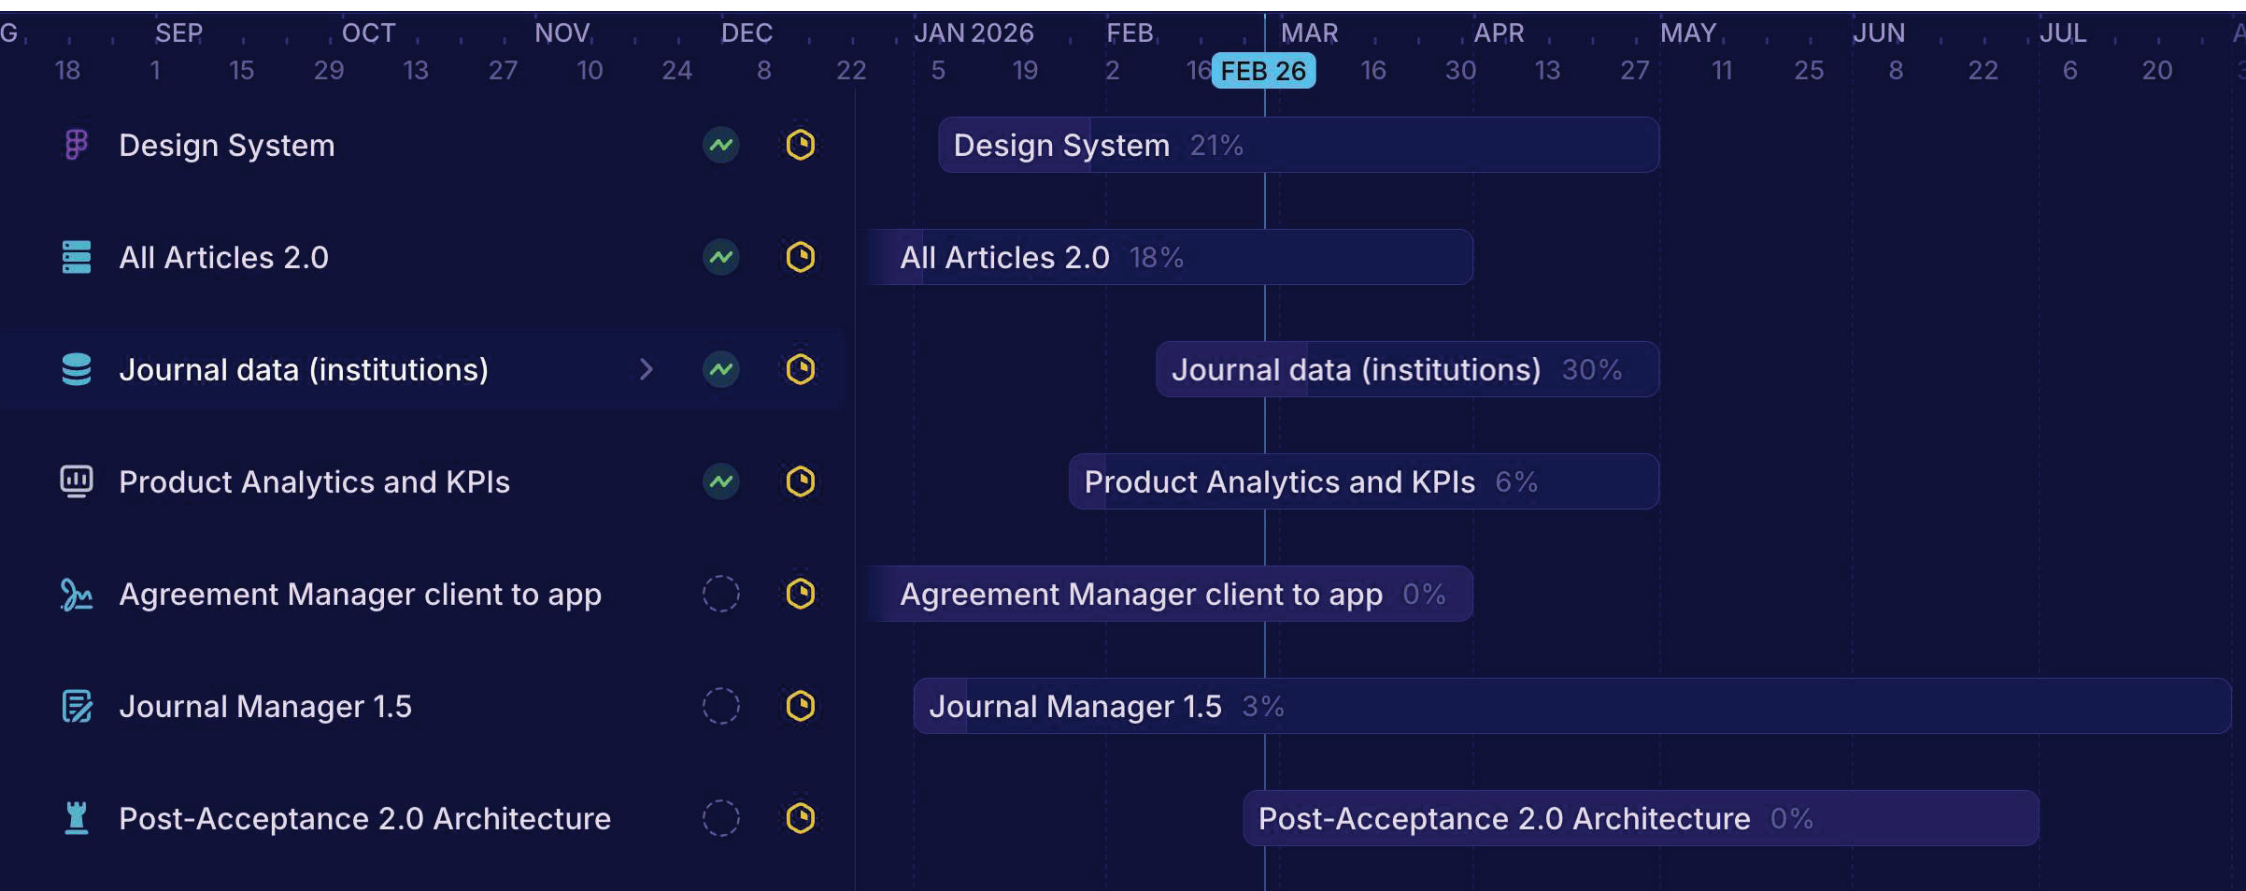

- Launch All Articles 2.0
- Finalize Agreement Manager
- Journal Manager 1.5 start work
- Post-Acceptance 2.0 planning & get going

D&D looking ahead

Customer Focus

- Retro OA for Thieme

Deals & Dollars Team

Team Manuscript last month's highlights

- IEEE Hypercare support has been smooth, with only minor issues raised and resolved promptly
- A small sub-team has begun scoping the Aries project
- Automating journal submission form creation, with testing ongoing in pre-production across all workflows and journals on the ACS site
- The new submission flow (Create Publication rewrite) is now live in production for ACS, with a significant reduction in support tickets already seen as a result

Team Manuscript looking ahead

- ACS journals to be launched in batches using the new journal submission form configuration, with 12 journals going live by end of March
- All outstanding ASM change requests to be completed

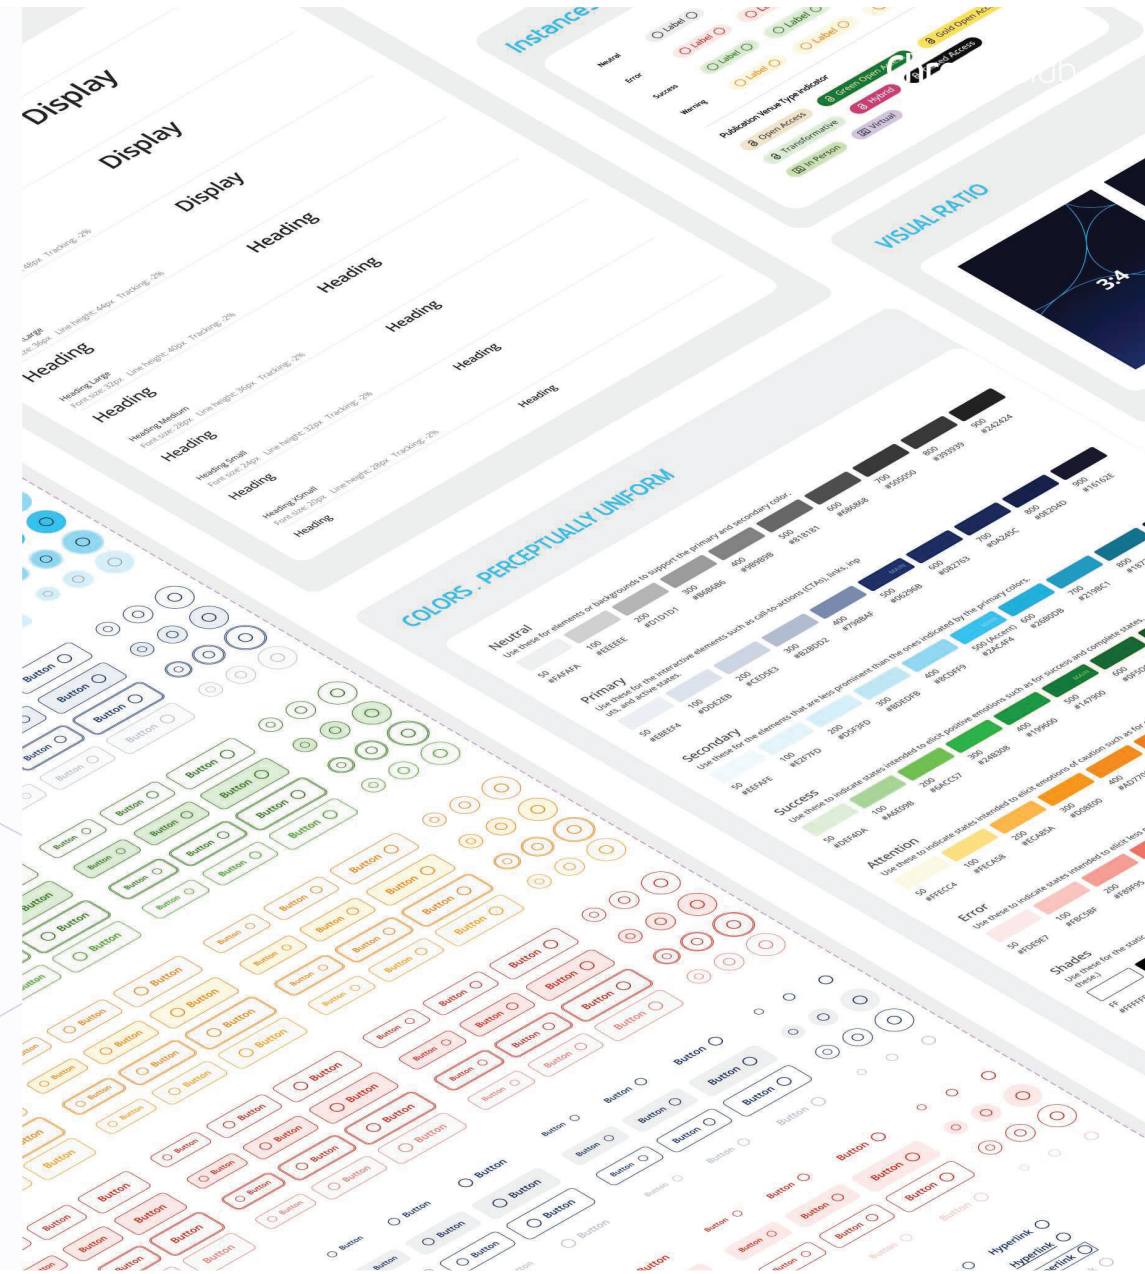

Discovery:

- Pre-submission tools — investigating the key issues impacting stakeholders at different levels throughout the submission process and working to validate findings
- IEEE submission processes — a number of workshops to be scheduled to kick off discovery
- Submission manager – Offering the publisher the ability to edit a submission form

What is a Design System?

A **design system** is a centralized collection of reusable **components**, **patterns**, and **guidelines** that define how a product **looks**, **feels**, and **behaves**. It includes **visual elements** (colors, typography, spacing), **UI components**, **interaction rules**, and **documentation** that help teams build consistent, high-quality experiences.

The Business Value of a Design System

Consistency & Quality

Ensures a unified user experience across all products and touchpoints, **strengthening brand trust**.

Scalability

Enables multiple teams to ship features confidently without reinventing patterns each time.

Increase revenue and profit

Speed & Efficiency

Teams build faster with reusable components—reducing duplicated work and accelerating time-to-market.

Collaboration

Creates a shared language between designers, developers, and product teams, improving alignment and decision-making.

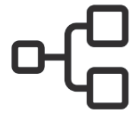

Reduce cost and expense

Approach to Product Design

The design system consists of standardized, manageable, and reusable components.

This building block approach applied throughout our product family can support us in serving our customers more resourcefully and efficiently.

The approach enables us to use interchangeable components to serve specific customer segments within a larger customer base.

Commercial Update

Marketing update

Update on the work with TBI Comms

Messaging framework based on our topline positioning:

ChronosHub - Connective infrastructure for modern publishing workflows

Supported by three core pillars:

- 1. Modernising publishing technology without disruption*
- 2. Author experience designed for modern research*
- 3. Enhancing operational efficiency*

Nearly finished the implementation plan for 2026

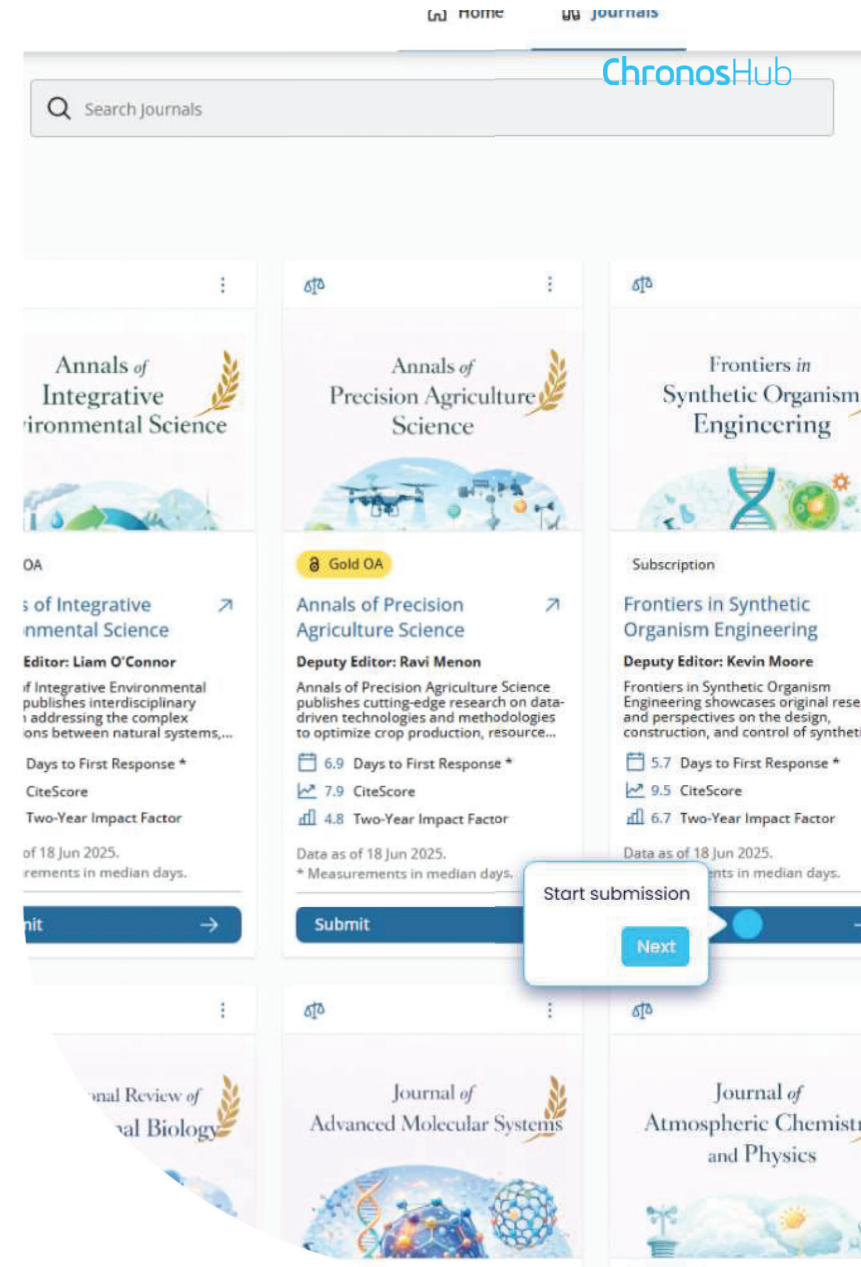

Signed a 2026 retainer with TBI to support the implementation throughout the year.

Marketing update

- Demo environment is live – selfguided tours of the platform
 - Sales collateral
 - Website: Easier understanding of the product
 - Onboarding
- One pagers / featurelists
 - One per platform module
 - Sales collateral
- Publishing Tech Trends report 2026
 - Internal interviews
 - Being revised by TBI. Several blog posts
- Communication outreach – big focus on LinkedIn
- Aries Microsite – early adopters program
- OA and Prestige Webinar

Commercial update

- Hosted their executive team in Copenhagen in Feb
- Contract finalized and currently under legal review
- Early Adopter Program designed and go-to-market preparations underway
- Let's wait until the ink is dry, but this is one to be genuinely excited about

- Kent is joining us next week as Partner Manager
- This week we hope to finalize the recruitment for the Customer Success ManagerPublisher role
- More customer facing resources to be added near term

Customer obsession

- Bug counts continue to decline
- We're responding faster to customer issues
- Great examples of us jumping on live calls to understand customer challenges

Thank you! Every ticket resolved is a small step for us to make customers happy, and maybe brand ambassadors one day.

Notes on using the presentation material

Presentation... stuff.

Use the template

Create your slide using a virgin instance of a template slide to prevent error accumulation.

Replace placeholder content

Use icons and images that illustrate the meaning of your content to enhance slide messaging.

Avoid using Sky

Do not apply the color Sky (#2ac4f4) or other colors of similar luminance to ensure accessibility.

Use the guidelines

Please consult the guidelines and follow the recommendations to use the template.

Event Committee

ChronosHub Summer Party 2026

 **June 12th**

☐ Lunch together after All-Hands

 Departure from the office at 13:00 (destination classified ☐)

 ☐ From 14:00... until 02:00 (yes, we mean it)

 Complete the form to confirm your presence

ChronosHub

People & Culture Updates

Training & Development

Process:

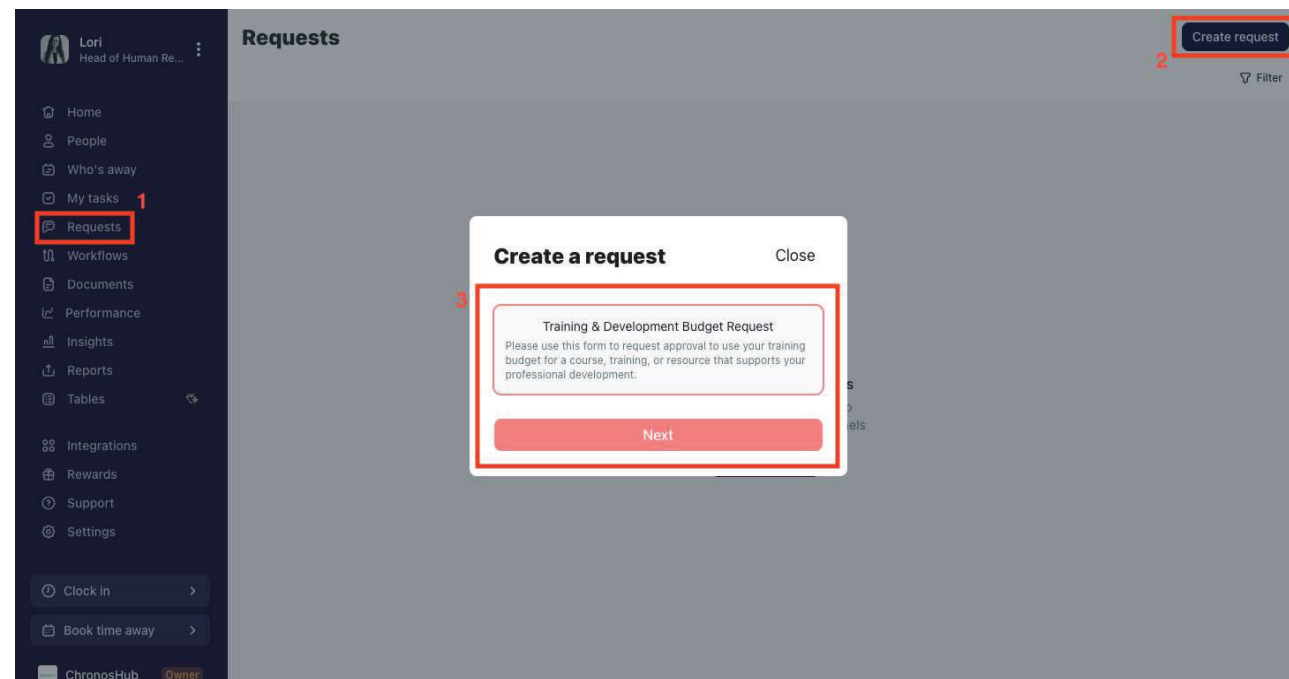

- Find the overview on the intranet -> [Training & development process](#)

How to request

- Use Humaans Request form

Deadlines:

- For training January – June 2026, requests must be submitted by December 31, 2025
- For training July – December 2026, request must be submitted by June 30, 2026

2025-H2 Employee Engagement Survey

40 of 41 Staff Responded
98% Response Rate

58% > 1 year at ChronosHub
42% < 1 year at ChronosHub

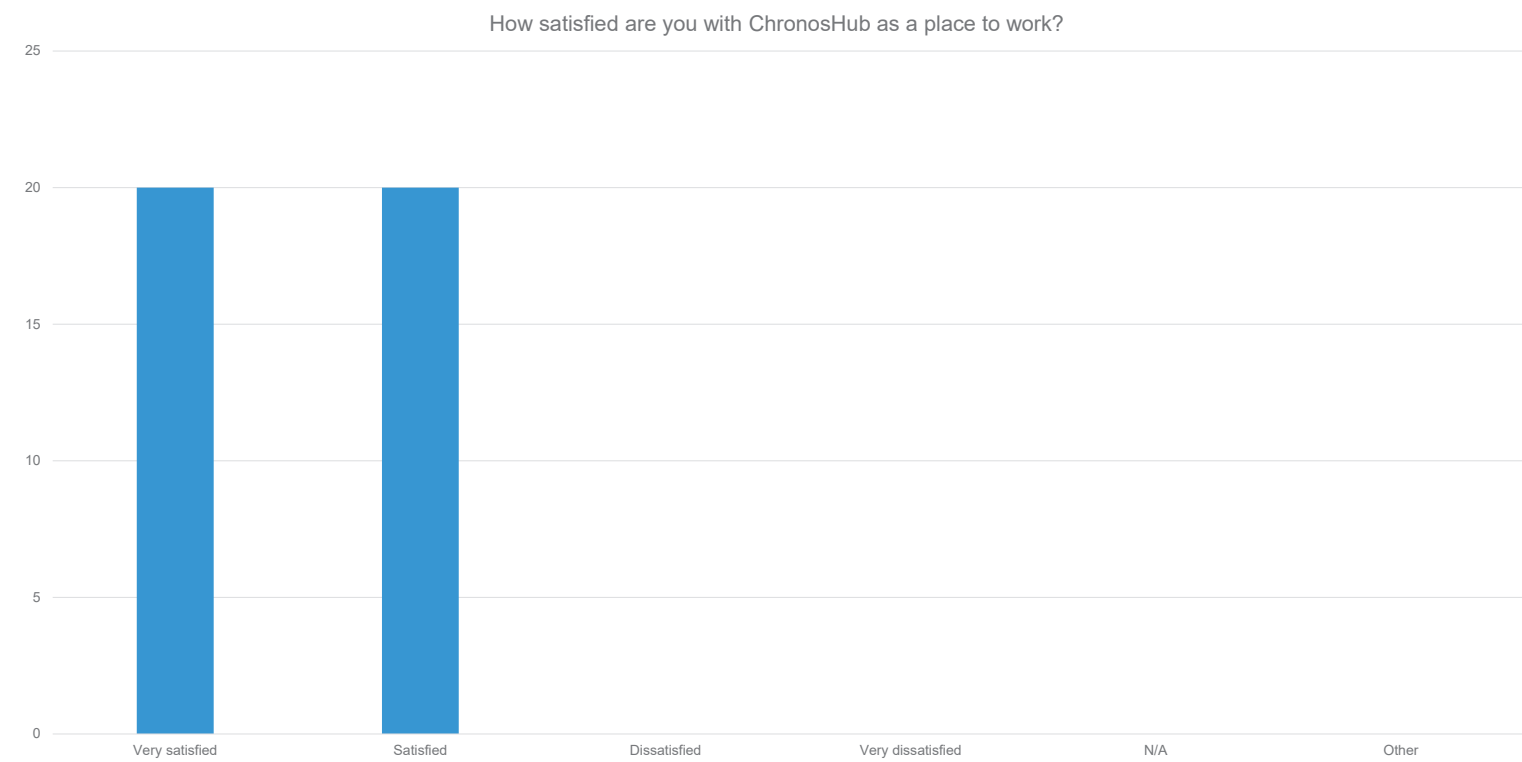

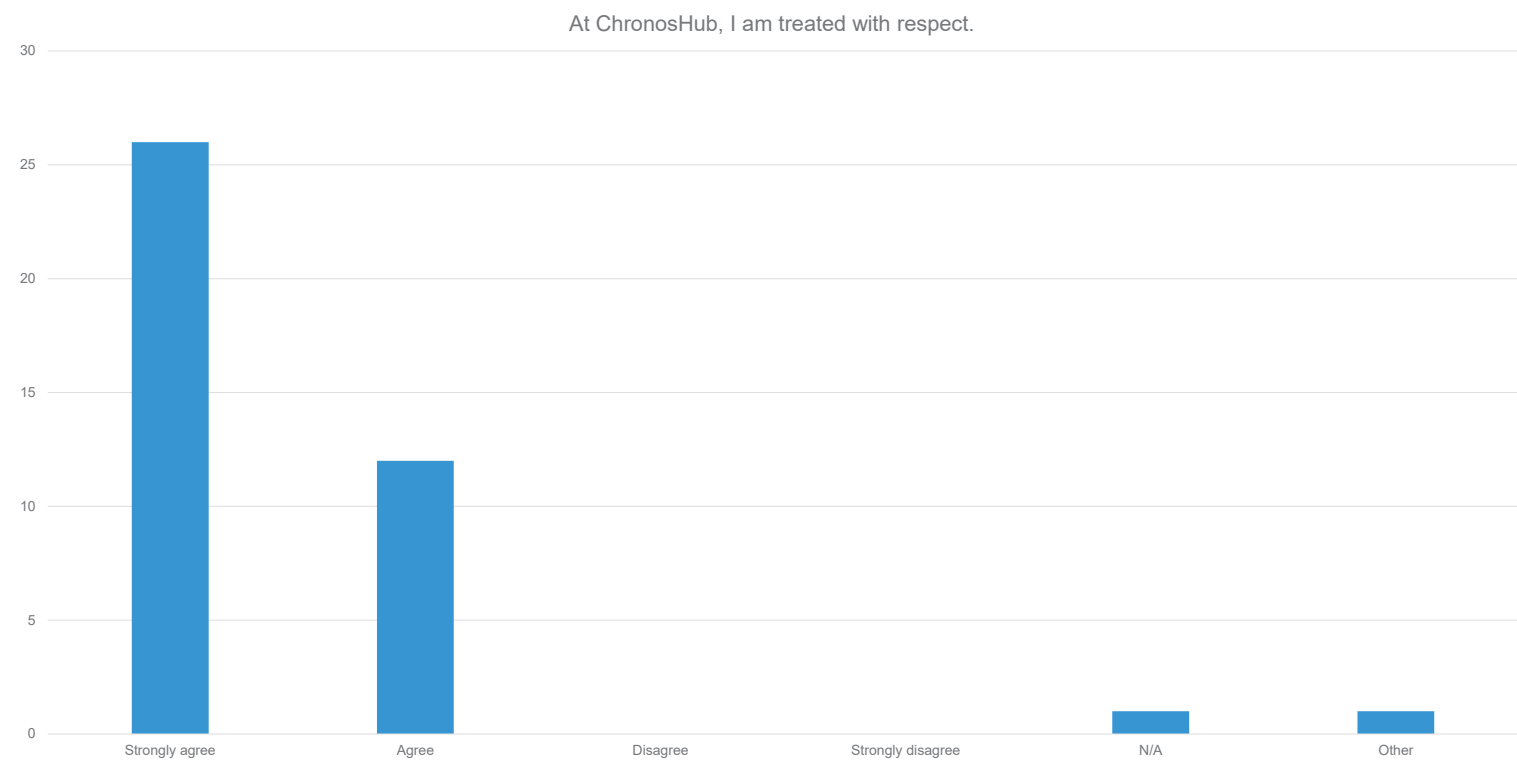

What's it like to work here?

ChronosHub

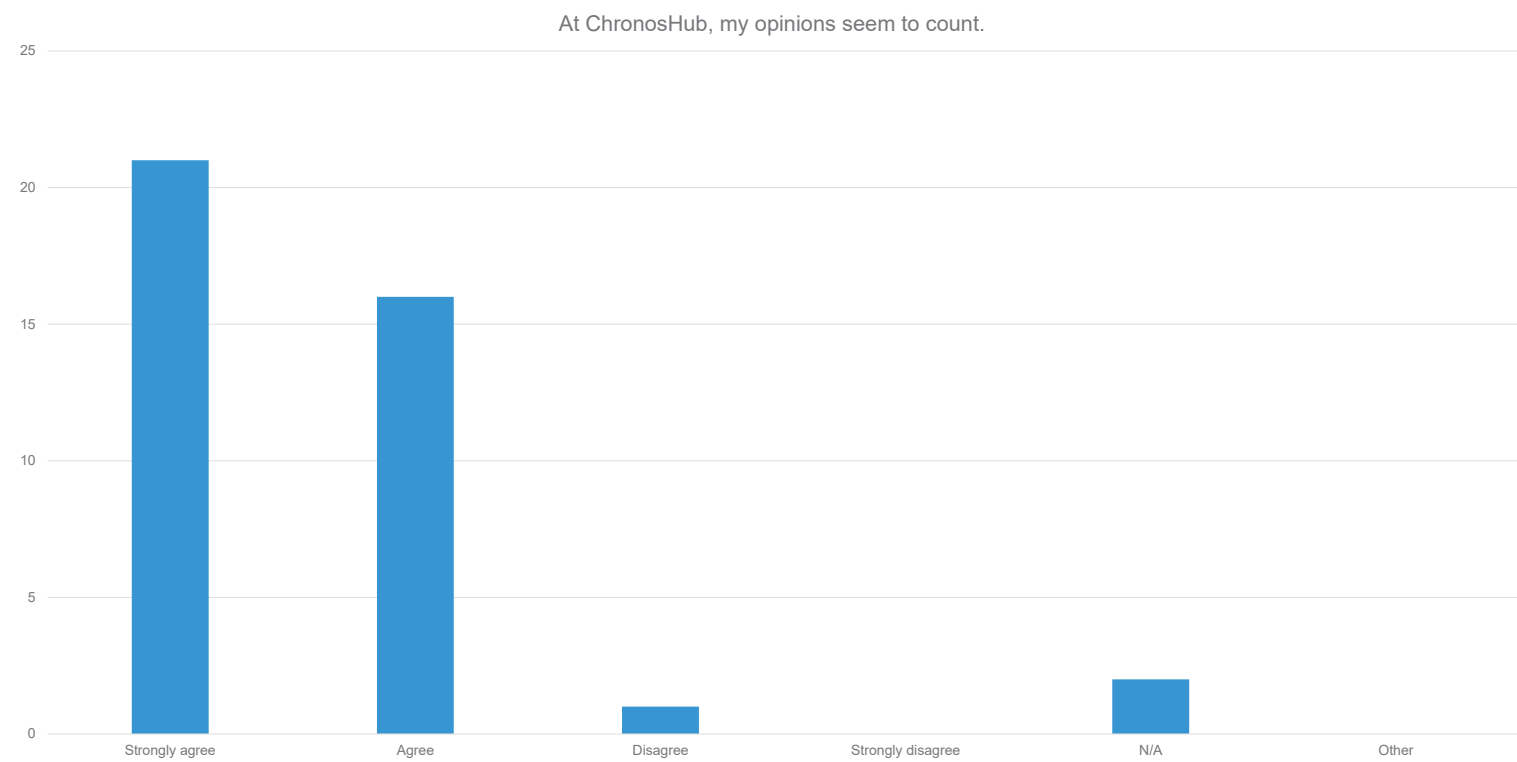

How satisfied are you with ChronosHub as a place to work?

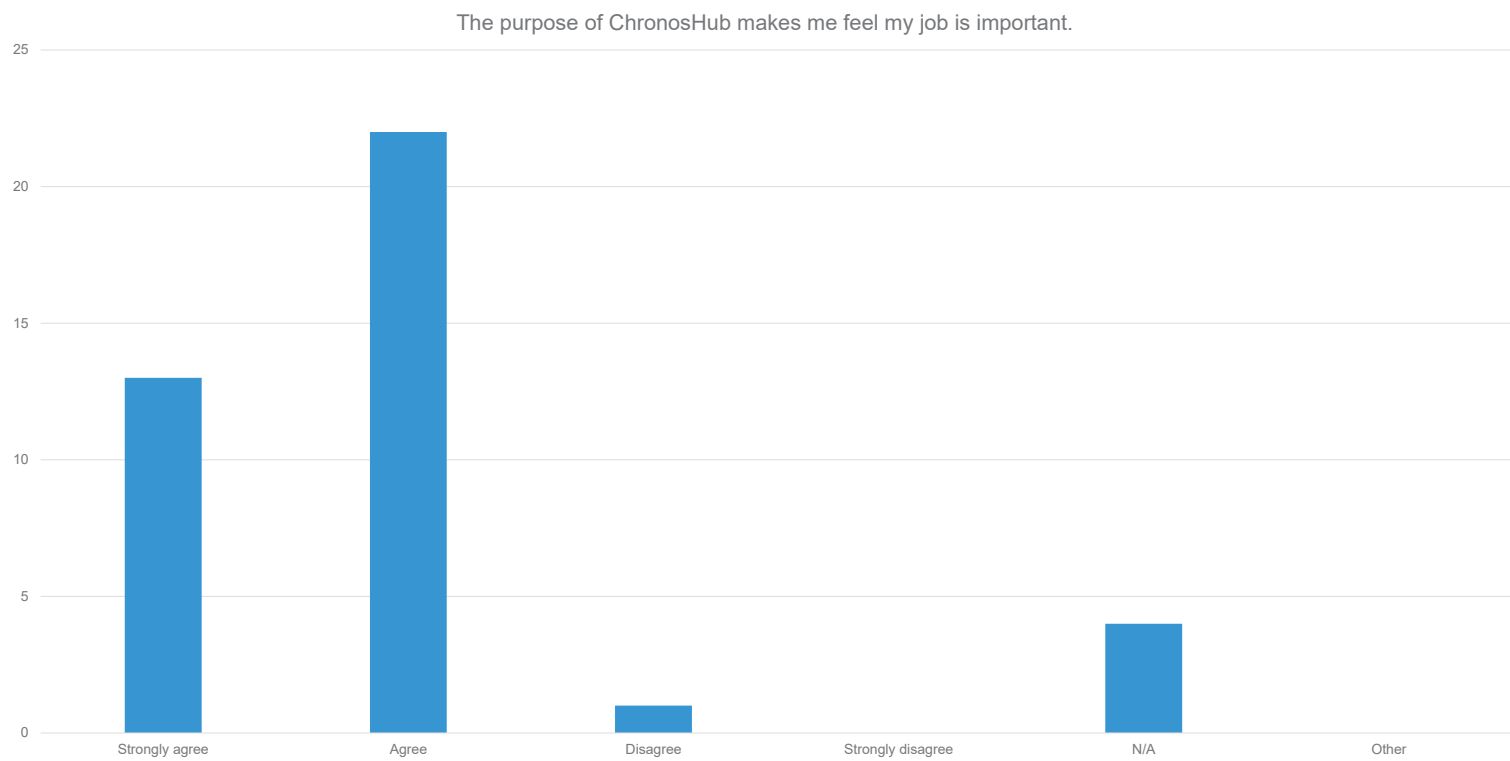

At ChronosHub, I am treated with respect.

At ChronosHub, my opinions seem to count.

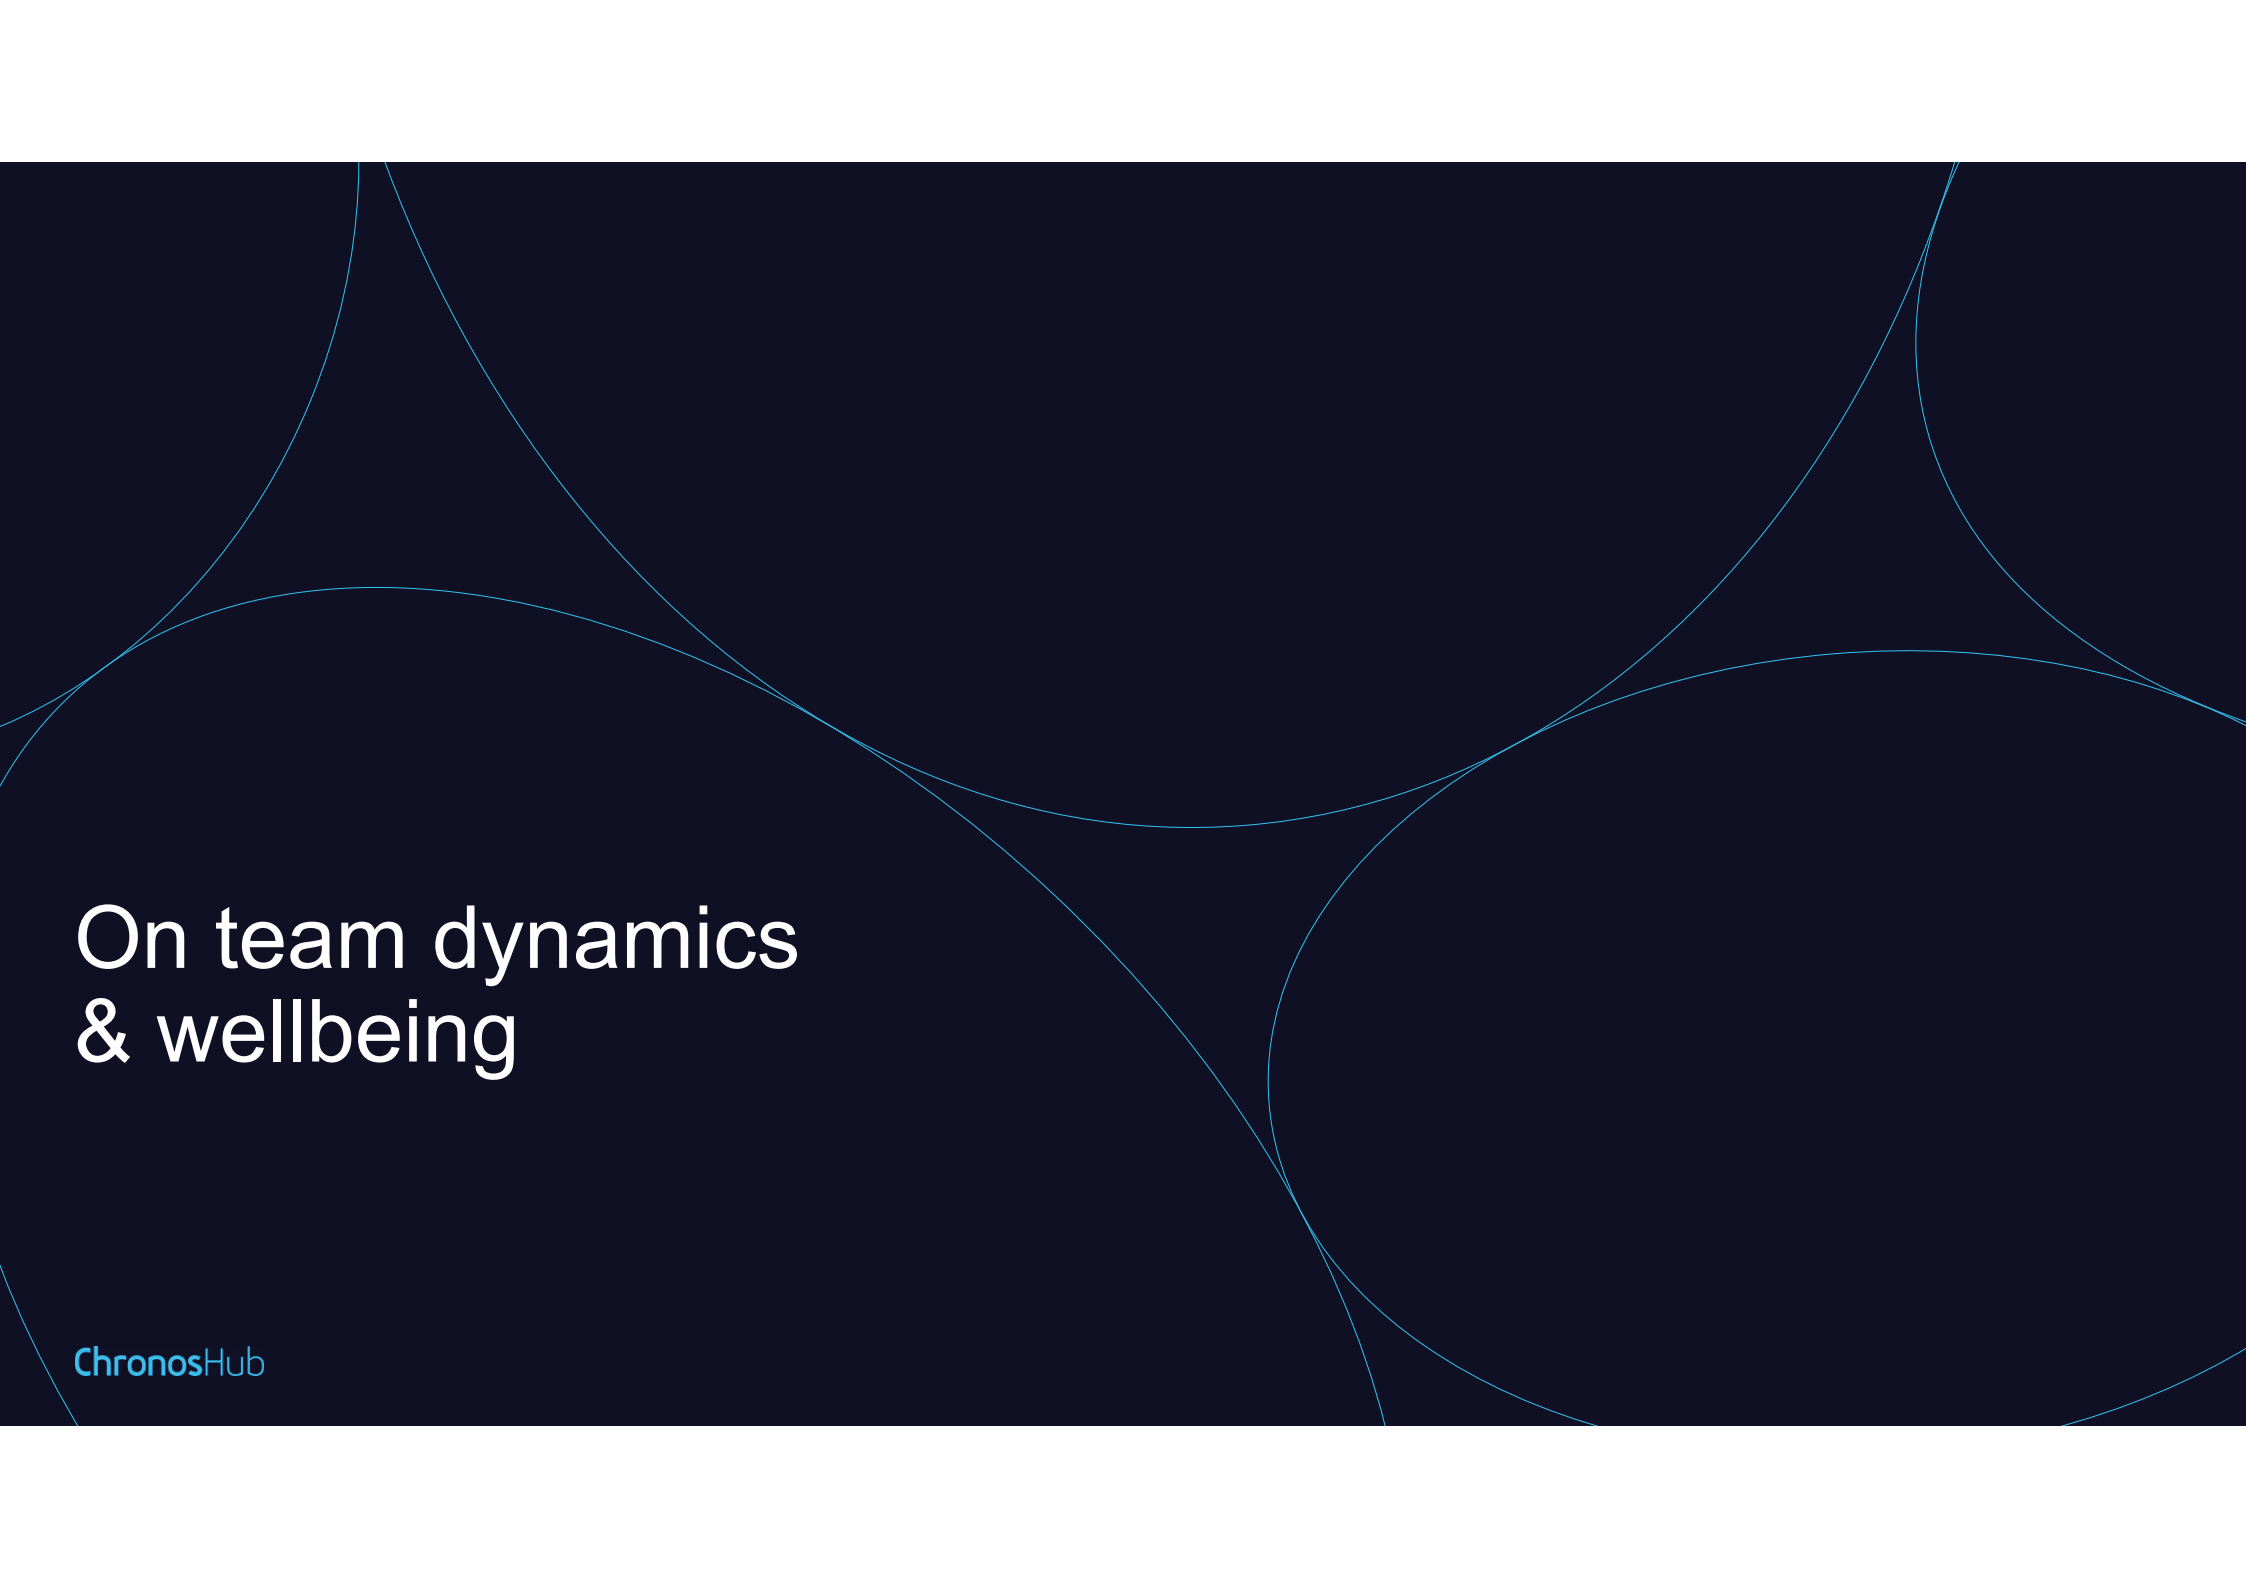

The purpose of ChronosHub makes me feel my job is important.

Please describe our company culture with one word:

ChronosHub

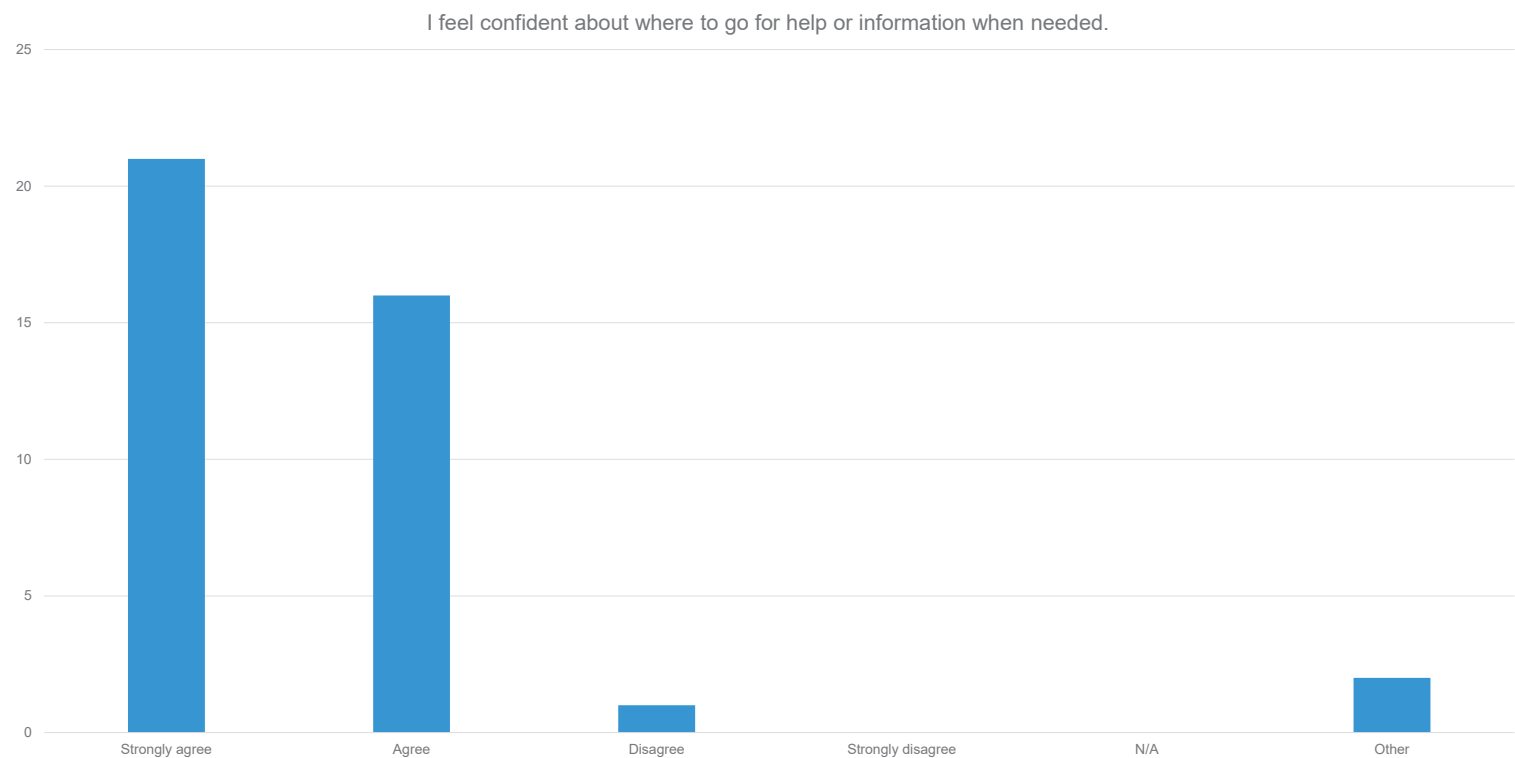

On team dynamics & wellbeing

ChronosHub

I feel confident about where to go for help or information when needed.

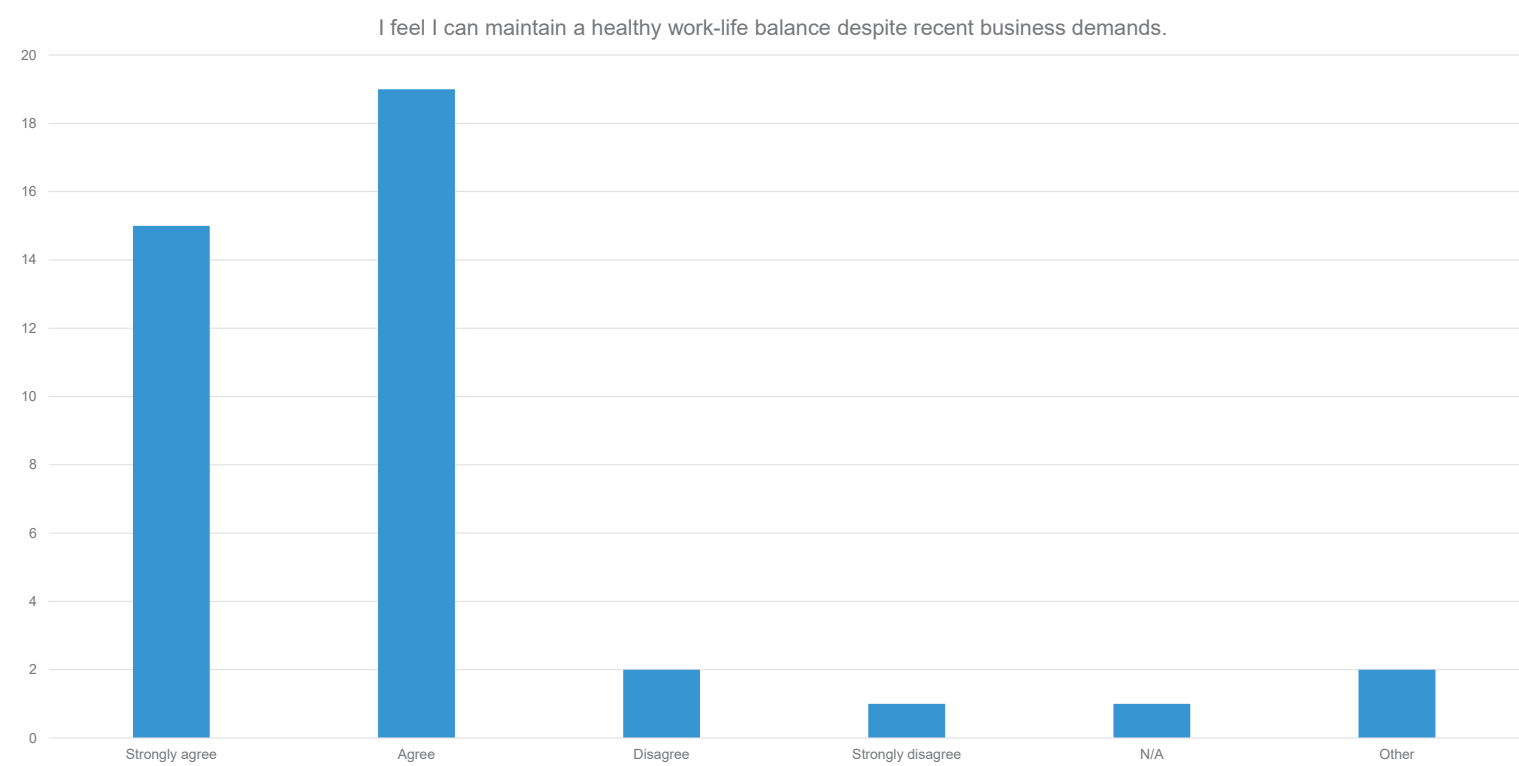

- I would have answered Agree/Strongly Agree 12 months ago but today I feel less confident about who I would speak to for help. As new people have joined roles and responsibilities have become blurred.
- It's between Agree and Disagree. Sometimes it feels like information is easily accessible, but other times it feels like either no one knows what's going on, or that I need to ask a lot around to find what I need.

I feel comfortable raising concerns about workload or wellbeing.

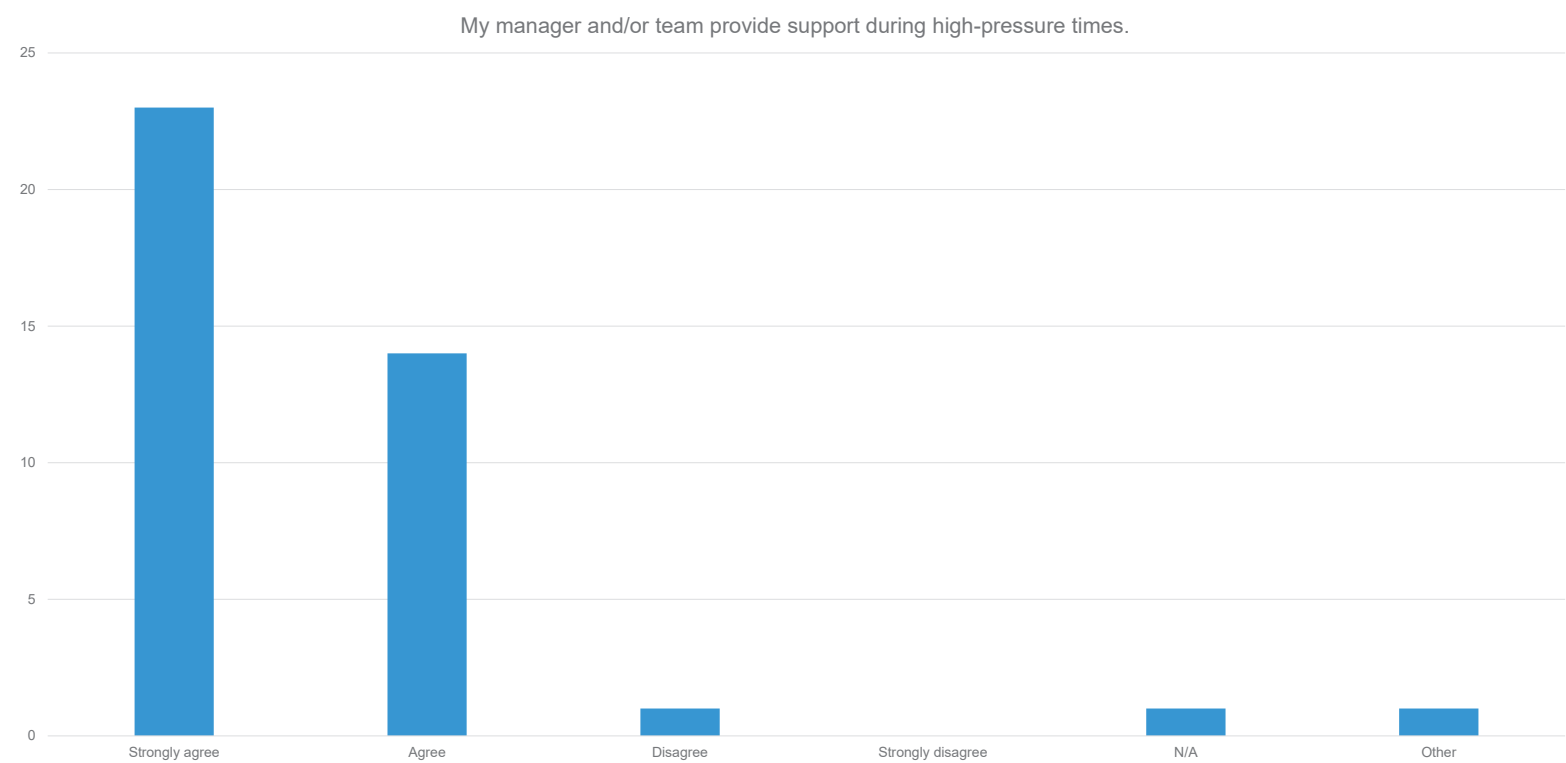

- I feel confident about raising concerns, I'm less confident that those concerns will be acknowledged and dealt with.

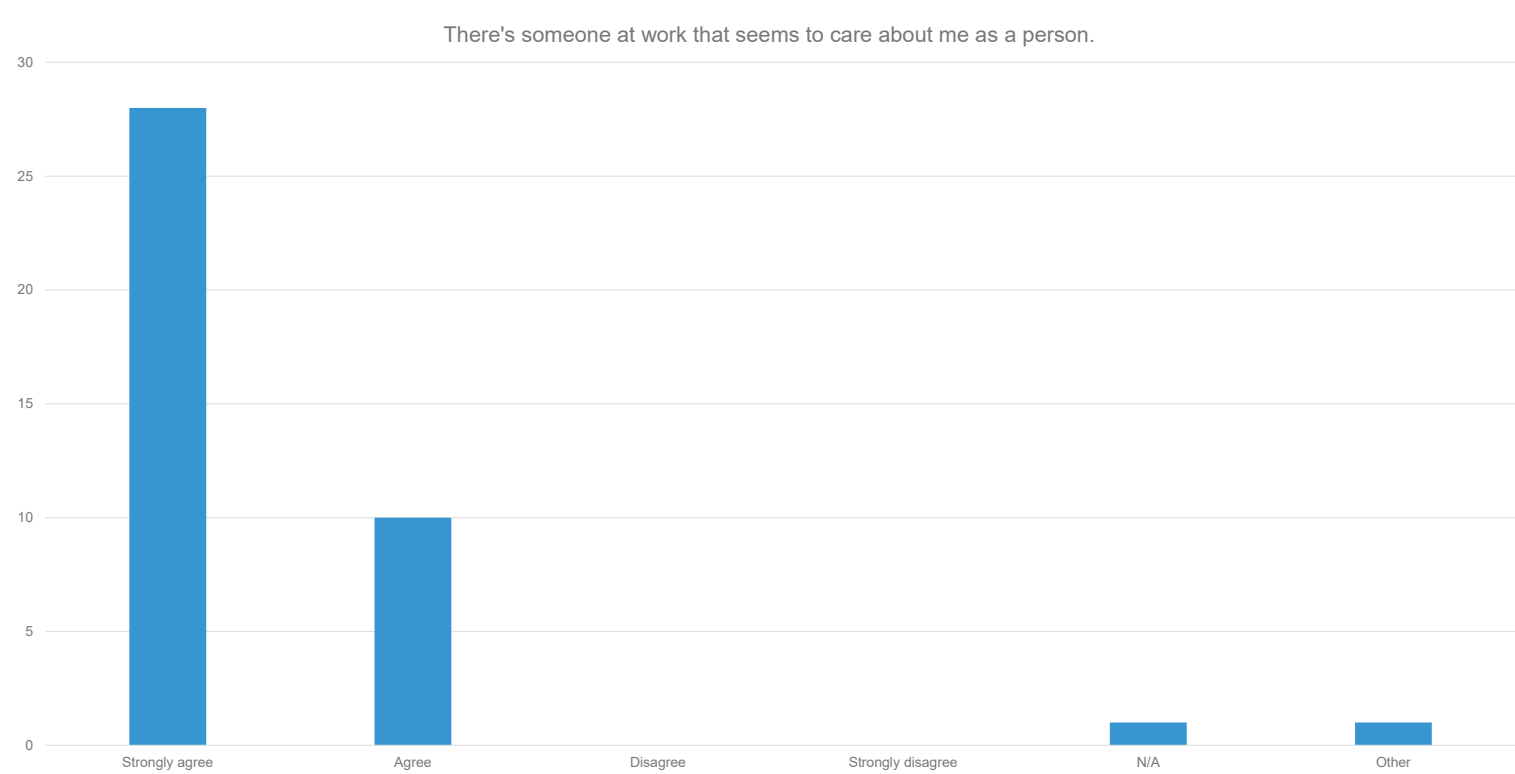

I feel I can maintain a healthy work-life balance despite recent business demands.

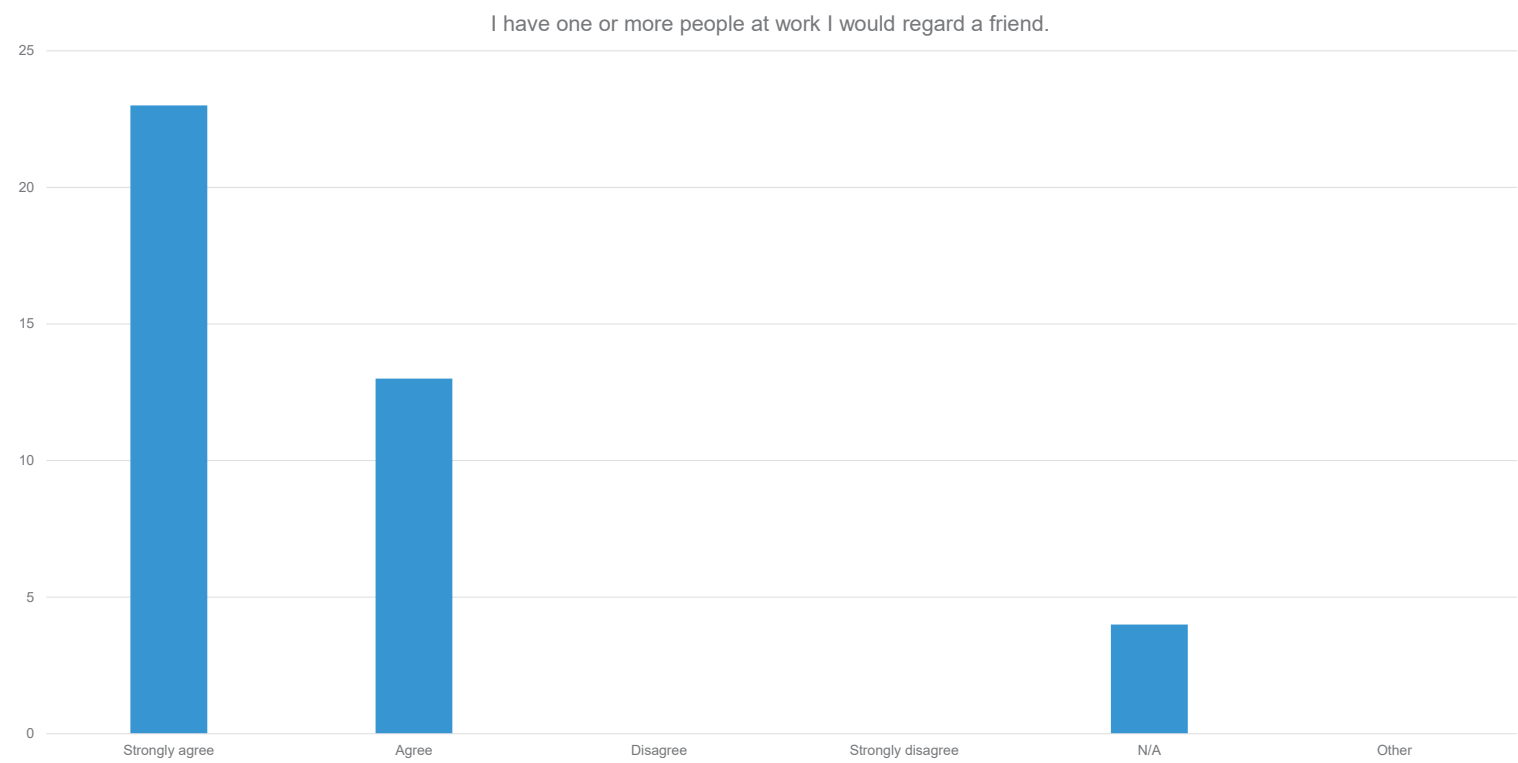

My manager and/or team provide support during high-pressure times.

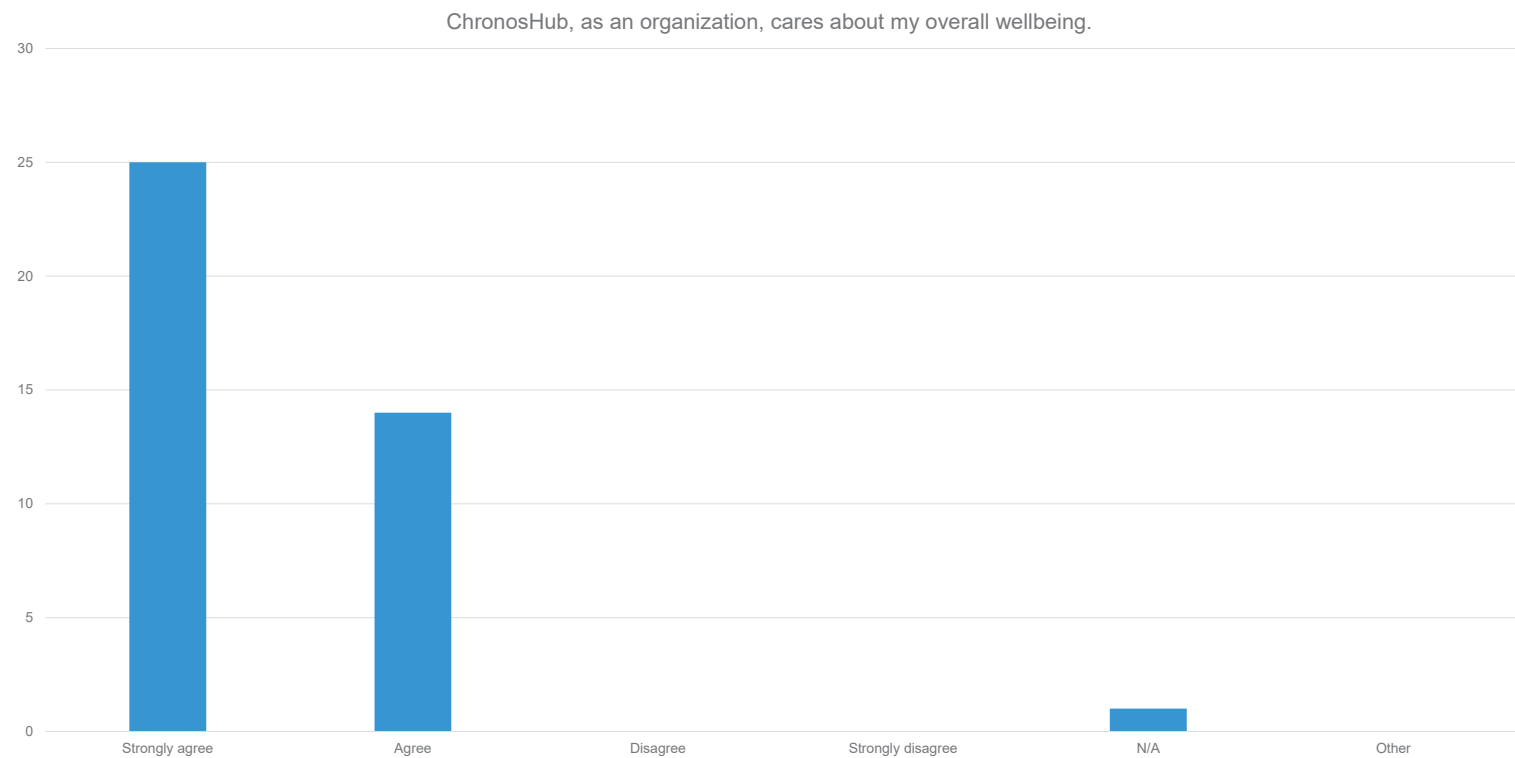

There's someone at work that seems to care about me as a person.

I have one or more people at work I would regard a friend.

ChronosHub, as an organization, cares about my overall wellbeing.

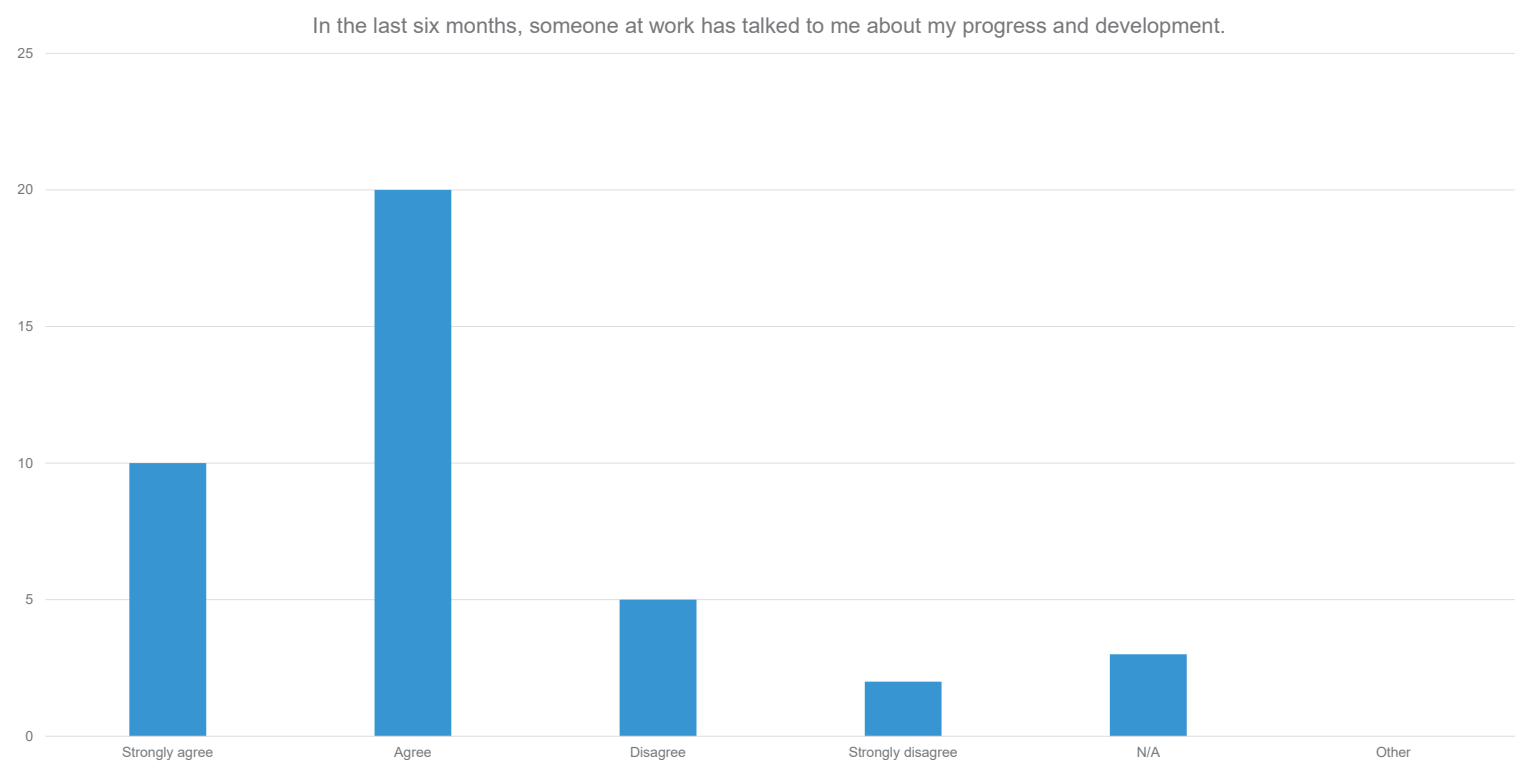

On feedback & professional development

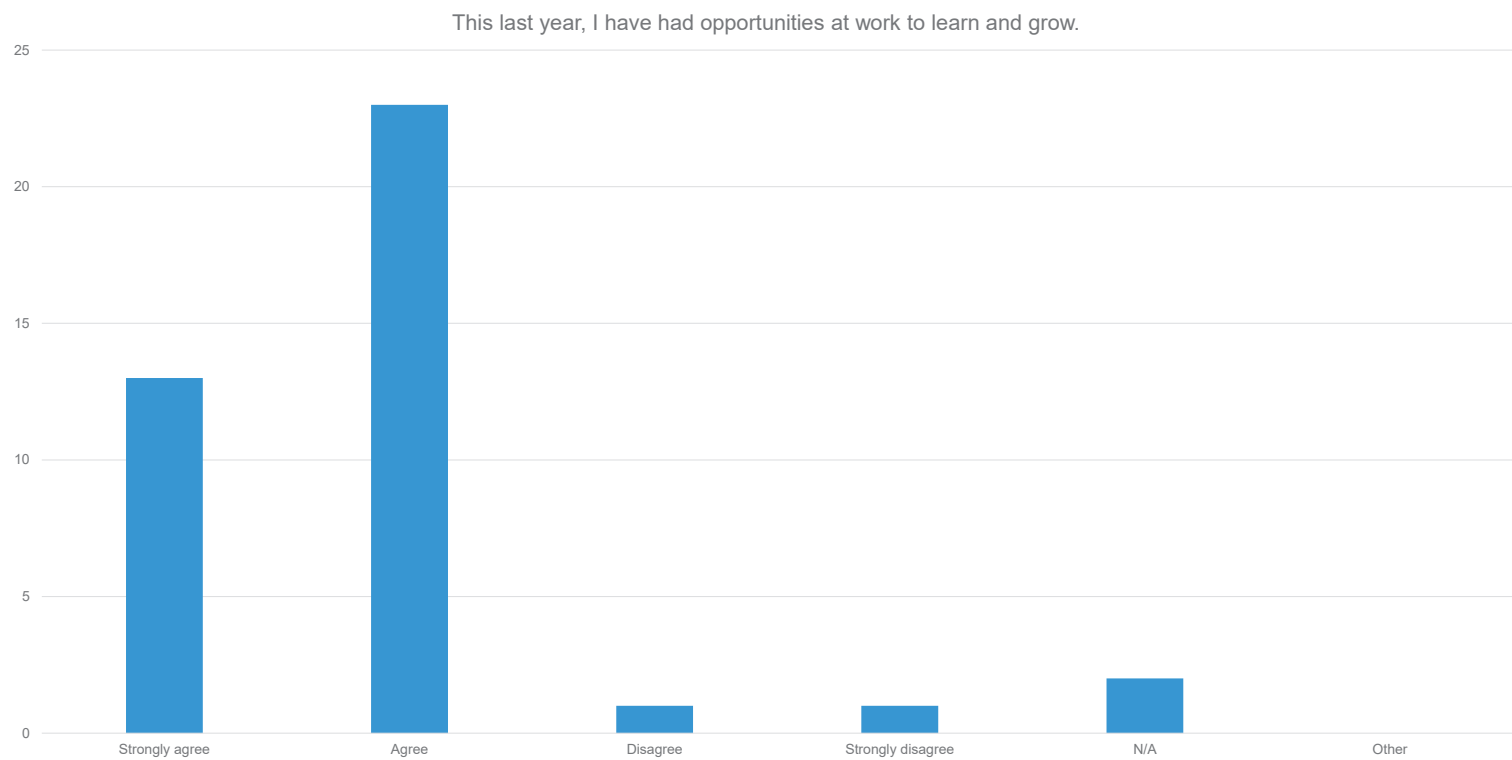

I have received meaningful feedback in the last two or three weeks.

In the last six months, someone at work has talked to me about my progress and development.

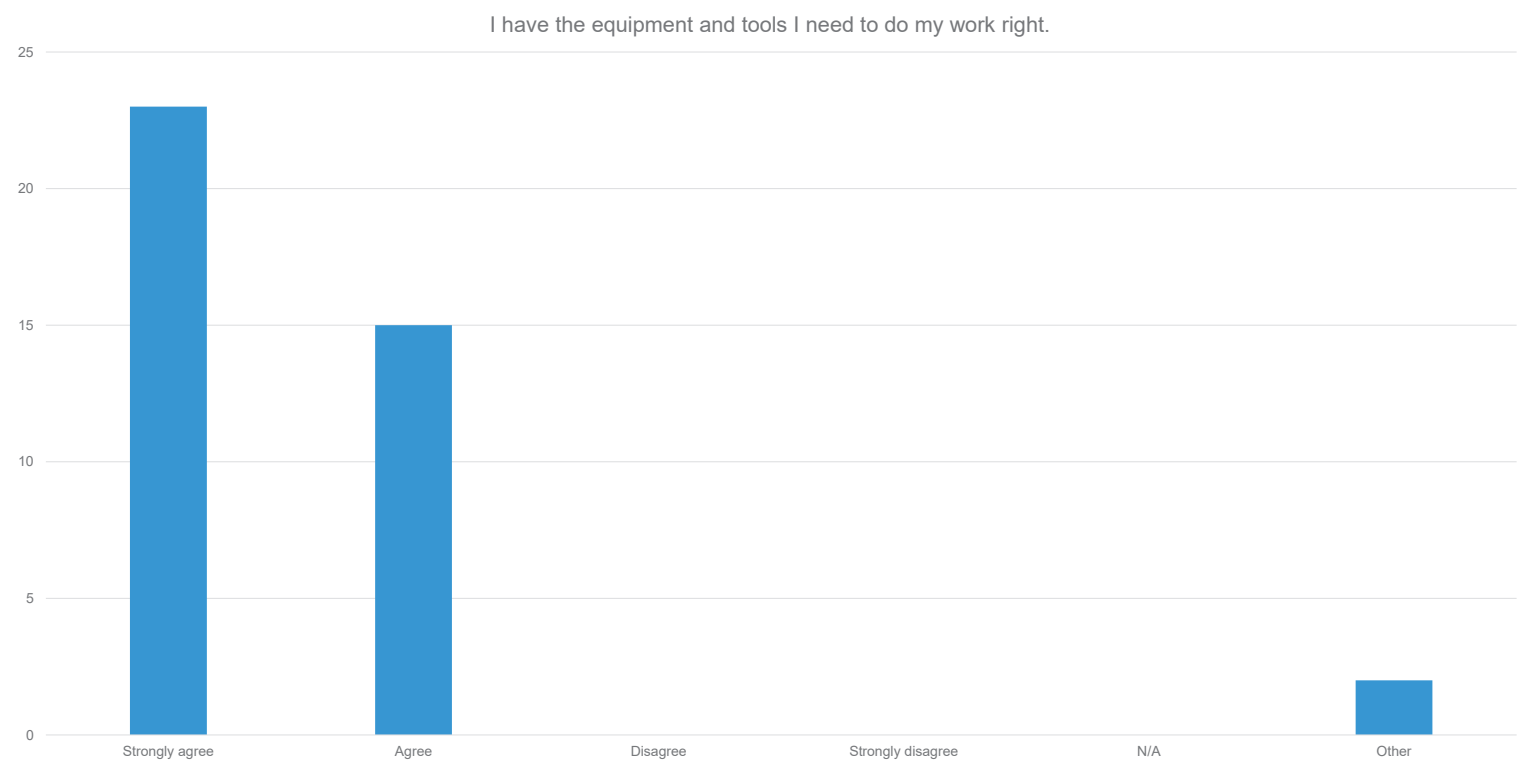

This last year, I have had opportunities at work to learn and grow.

On work quality & delivery

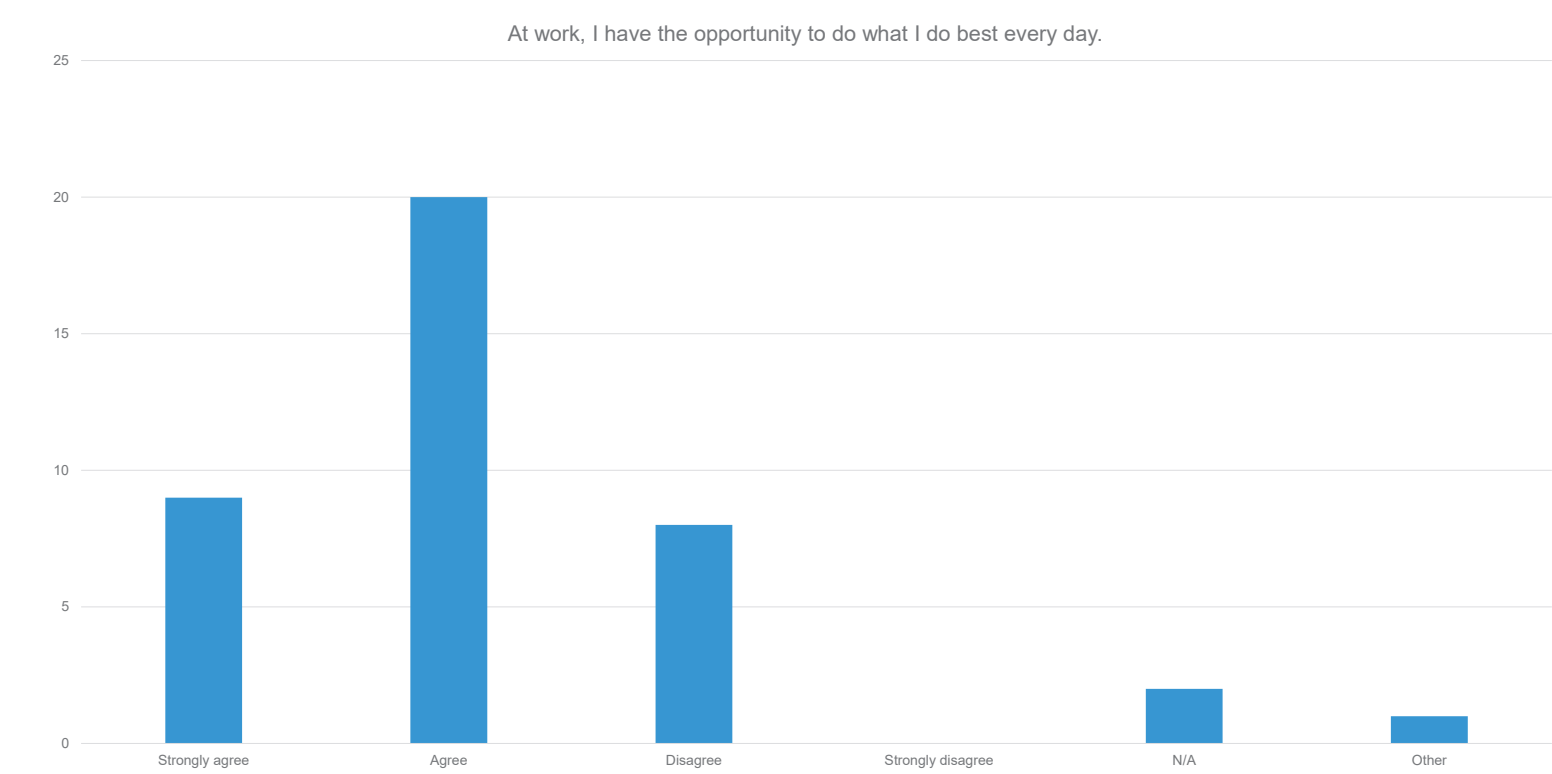

ChronosHub

I have the equipment and tools I need to do my work right.

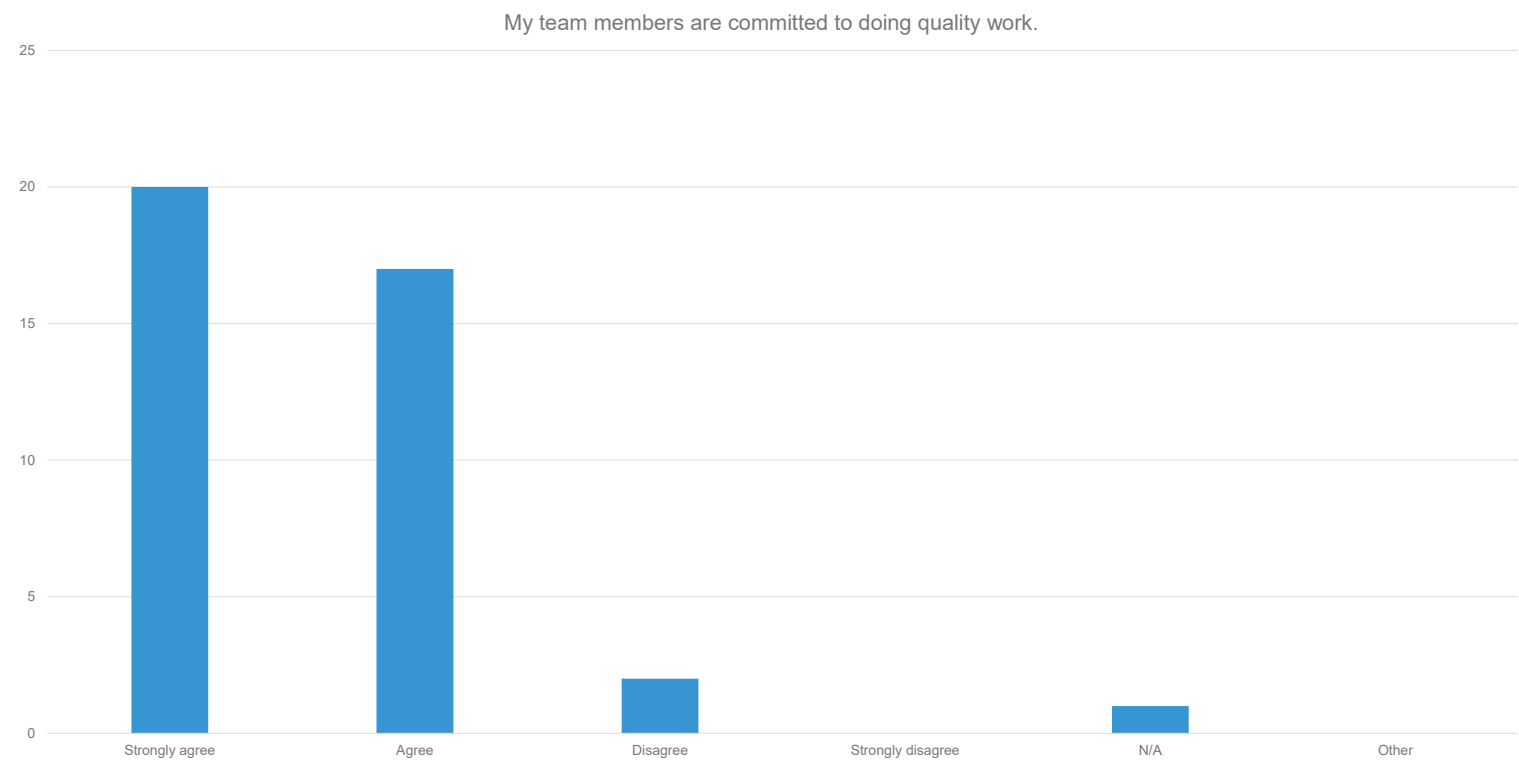

- In terms of technical equipment I have everything I need, but we are desperately lacking in policies, processes and procedures which we all need in order to be effective in our roles.
- I would choose Agree, but to expand on that, I think we are missing some nice headphones as part of the equipment package.

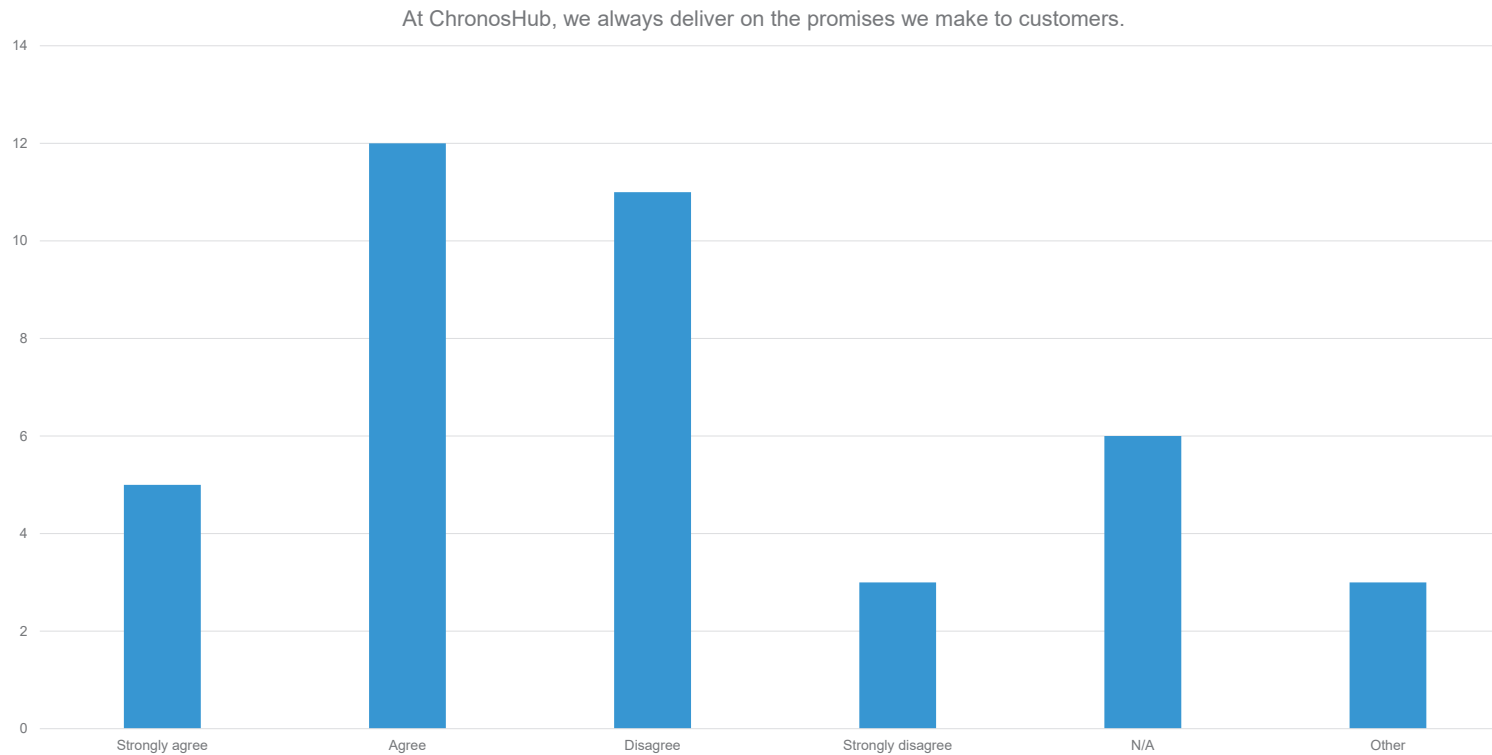

At work, I have the opportunity to do what I do best every day.

My team members are committed to doing quality work.

At ChronosHub, we always deliver on the promises we make to customers.

- We try really hard and are improving every day
- This is a hard question to answer. I believe to always deliver what we commit to.

H2-2025 Employee Engagement Survey: TL;DR

Top strengths

Employee satisfaction is high:

- 50% replied with satisfied and 50% replied with very satisfied

Commitment to quality & purpose:

- Strong agreement that team members are committed to quality work. Employees feel the company purpose makes their job important.

Strong culture & peer relationships:

- High agreement that employees are treated with respect.
- Comments highlight strong support from colleagues even during high workload periods.

Improvement areas

Role clarity:

- As CH has grown and has more well-defined teams, there is some uncertainty about roles and responsibilities.

Processes & operational maturity:

- Mention of single person dependencies, need for policies and clear processes to aid effectiveness.

Feedback & growth:

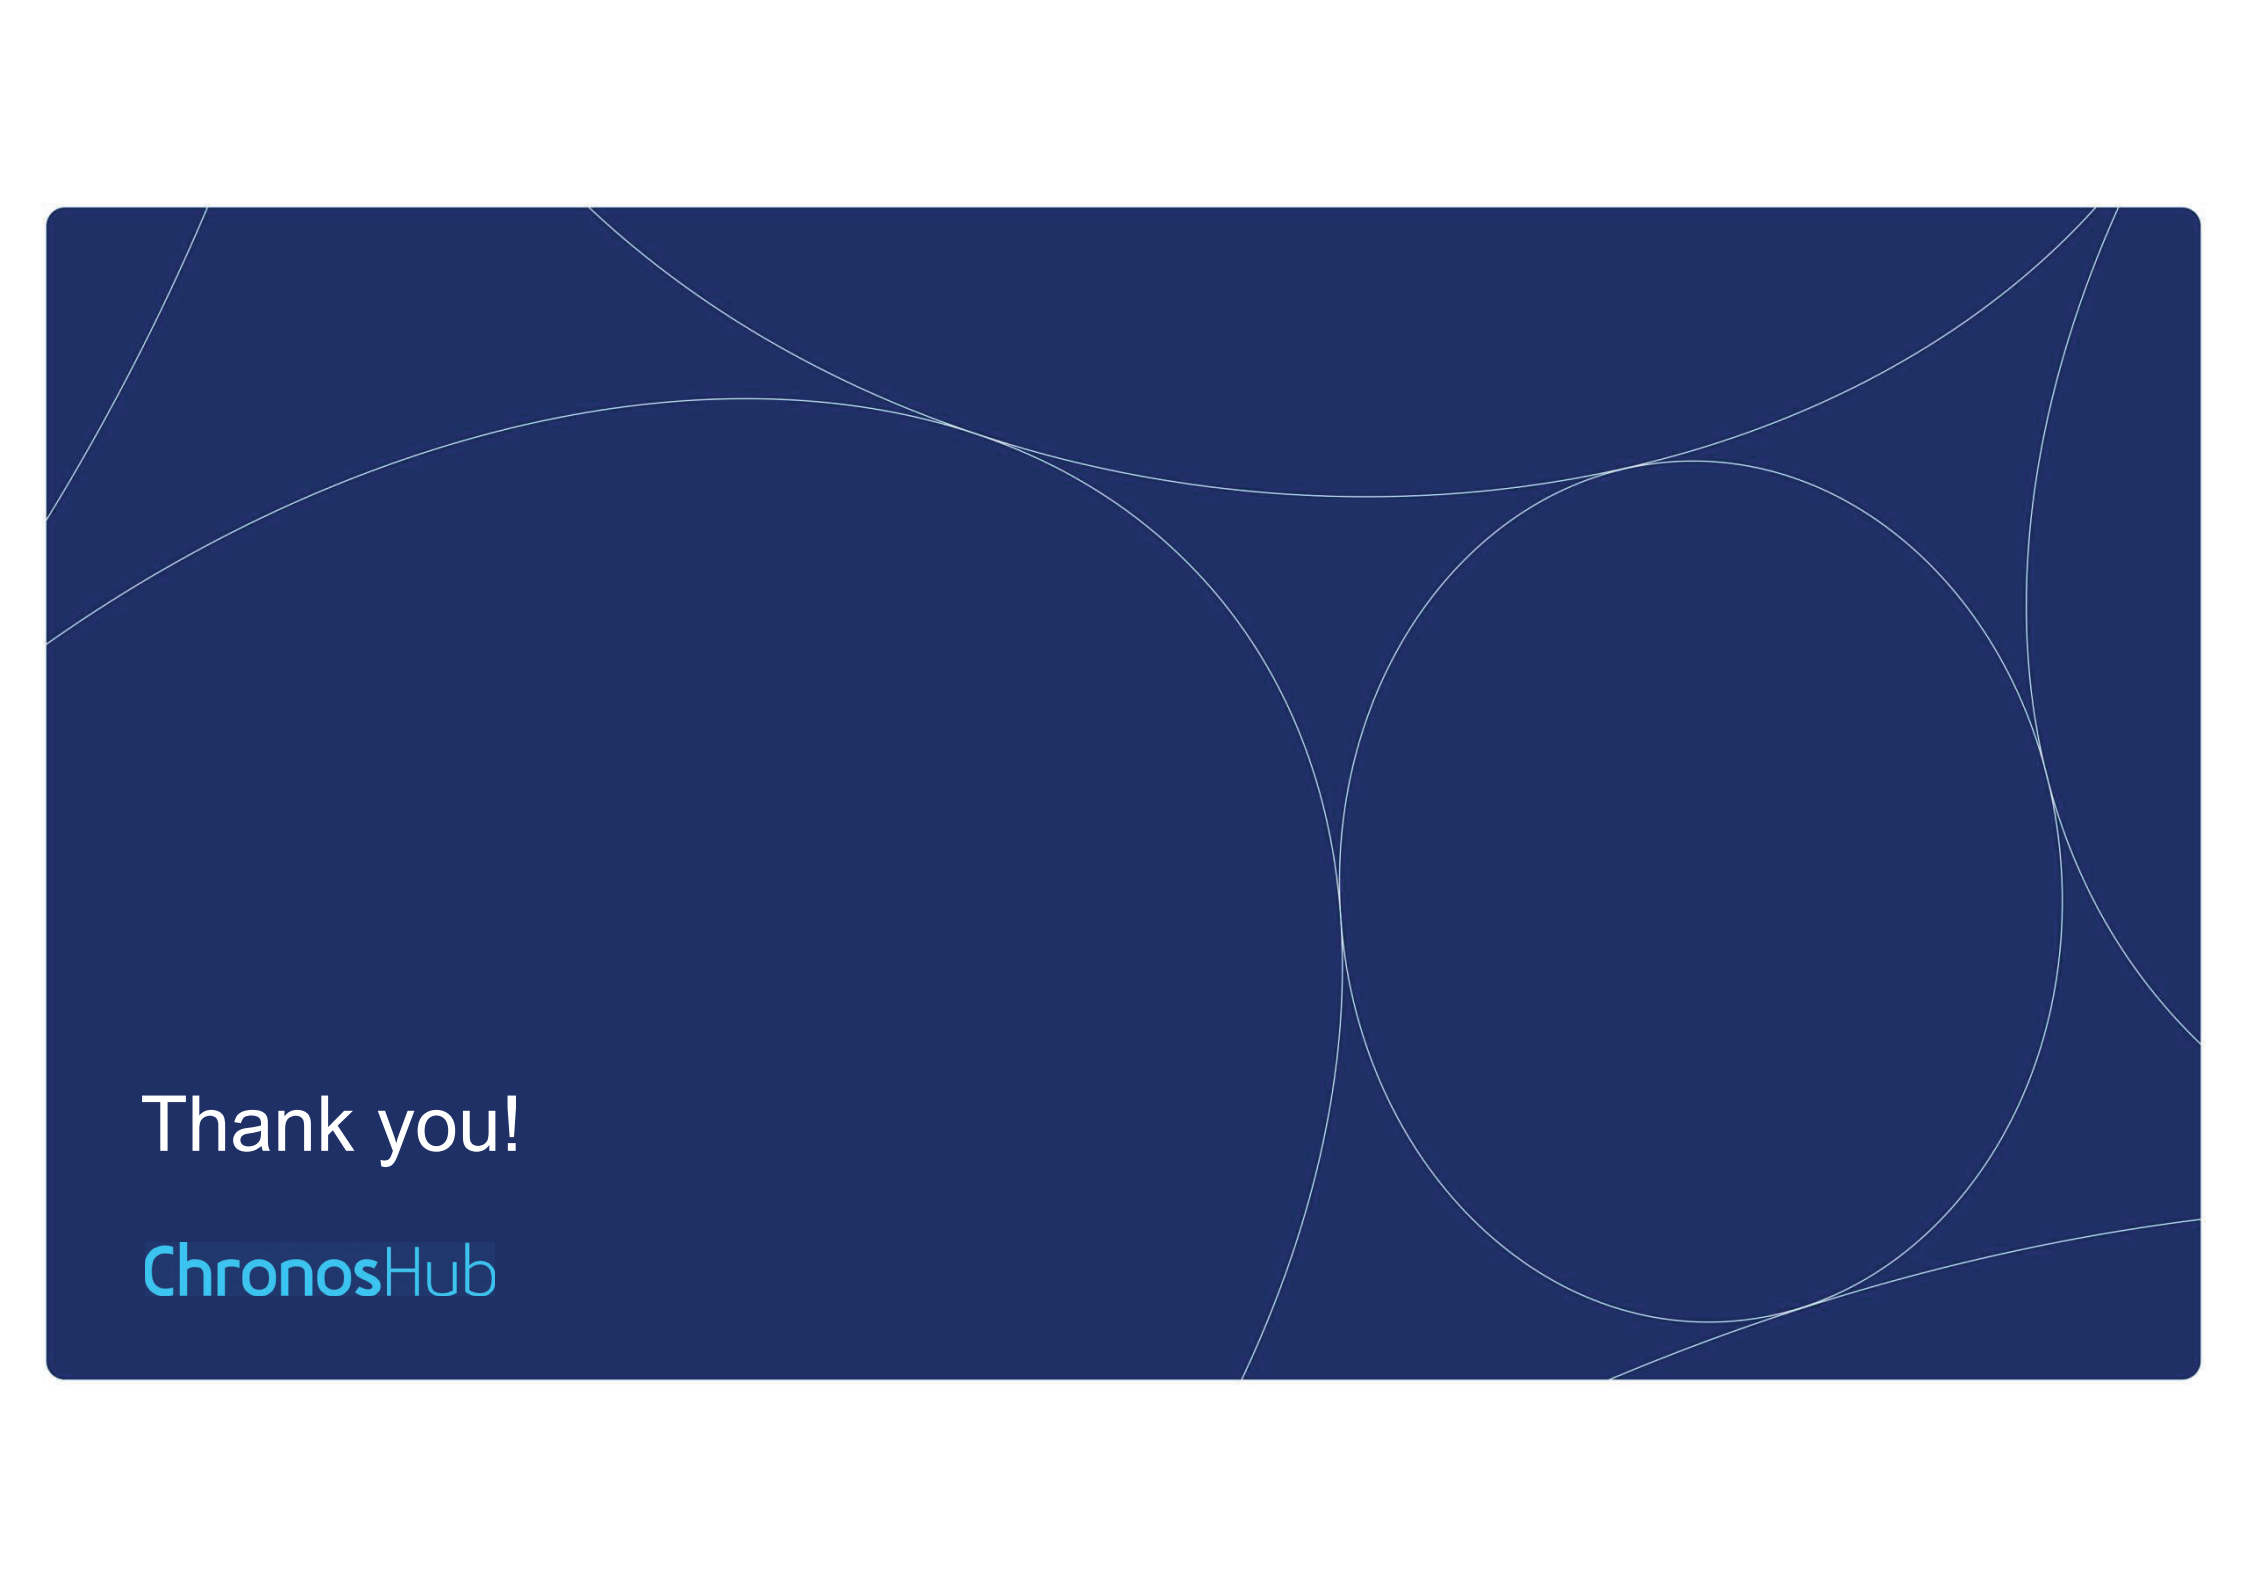

- Scores indicating of the need for regular performance and career development talks.

Next steps

- Role descriptions are being launched for all employees to create role clarity internally and also cross-functionally.
- People & Culture (and Operations) are already working on setting work processes in place and defining policies to ensure transparency and clarity.
- People annual wheel and career progression frameworks are on the roadmap for People & Culture.
- Launch regular engagement surveys to collect feedback more frequently in a growing team.

A photograph of a classroom setting. In the foreground, a hand is raised high, palm facing forward. In the background, several other hands are also raised, though they are out of focus. The background is a solid green chalkboard. The text "Any questions?" is written in white on the right side of the chalkboard.

Any questions?

Thank you!

ChronosHub
